**Specificity**

**Chicken anti Rabbit Interleukin-13** recognizes rabbit interleukin-13 (IL-13).

Rabbit interleukin-13 is an immunoregulatory cytokine produced by activated T helper type 2 (Th2) cells. IL-13 induces the expression of 15-lipoxygenase and leads to production of vasodilatory eicosanoids ([Tang \*et al.\* 2003](#)). Rabbits exposed to IL-13 showed increased airway hyperresponsiveness and inflammation ([Josephson \*et al.\* 2012](#)).
