

Datasheet: AHP2838Z

Description:	RABBIT ANTI HUMAN INTERLEUKIN-17D:Preservative Free
Specificity:	IL-17D
Format:	Preservative Free
Product Type:	Polyclonal Antibody
Isotype:	Polyclonal IgG
Quantity:	0.1 mg

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
ELISA	▪			0.5 ug/ml - 2.0 ug/ml
Western Blotting	▪			0.1 ug/ml - 0.2 ug/ml

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.

Target Species	Human
Product Form	Purified IgG - lyophilized
Reconstitution	Reconstitute with 0.1 ml distilled water
Antiserum Preparation	Produced from sera of rabbits immunized with recombinant human interleukin-17D and purified by affinity chromatography
Buffer Solution	Phosphate buffered saline
Preservative Stabilisers	None present
Carrier Free	Yes
Endotoxin Level	< 0.1 ng/µg of protein (< 1 EU/µg)
Approx. Protein	IgG concentration 1.0 mg/ml after reconstitution

Concentrations

Immunogen *E. coli* derived recombinant human interleukin-17D

Synonyms IL27

Specificity **Rabbit anti Human interleukin-17D antibody**, recognizes interleukin-17D (IL-17D), also known as IL-27.

IL-17D is a member of the IL-17 family of cytokines. The receptor of 17-D has yet to be identified, although there have been some reports that it is able to interact with the receptor IL-17RA. There is also limited information regarding the biological functions elicited by IL-17D, however it is believed to stimulate the production of other cytokines including IL-6, IL-8 and GM-CSF. IL-17D may also play a role in local immune responses through induction of myeloid growth factors, chemokines, stimulatory local infiltration and proliferation of leukocytes ([Liu et al. 2020](#)).

Storage Prior to reconstitution store at -20°C.
After reconstitution store at -20°C.

This product should be stored undiluted. Storage in frost-free freezers is not recommended. Avoid repeated freezing and thawing as this may denature the antibody. Should this product contain a precipitate we recommend microcentrifugation before use.

Guarantee 12 months from date of despatch
