#### Target Species

Human

#### Product Form

Purified IgG - lyophilised

#### Reconstitution

Reconstitute with 0.1 ml distilled water. Care should be taken during reconstitution as the protein may appear as a film at the bottom of the vial. Bio-Rad recommend that the vial is gently vortexed after reconstitution and microcentrifuged before use.

#### Antiserum Preparation

Antisera to human IL-13 were raised by repeated immunisation of rabbits with highly purified antigen. Purified IgG was prepared from whole serum by antigen affinity chromatography.

#### Buffer Solution

Phosphate buffered saline
