

Datasheet: AHP2984

BATCH NUMBER 159905

Description:	RABBIT ANTI GREEN FLUORESCENT PROTEIN
Specificity:	GREEN FLUORESCENT PROTEIN
Other names:	GFP
Format:	Purified
Product Type:	Polyclonal Antibody
Isotype:	Polyclonal IgG
Quantity:	50 µg

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
Western Blotting	▪			0.5 - 4.0 ug/ml

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.

Product Form	Purified IgG - liquid
---------------------	-----------------------

Antiserum Preparation	Antiserum to green fluorescent protein (GFP) was raised by repeated immunisation of rabbits with highly purified antigen. Purified IgG was prepared from whole serum by affinity chromatography.
------------------------------	--

Buffer Solution	Phosphate buffered saline
------------------------	---------------------------

Preservative Stabilisers	30% Glycerol 0.5% Bovine Serum Albumin 0.03% Proclin™300
-------------------------------------	--

Approx. Protein Concentrations	IgG concentration 0.5 mg/ml
---	-----------------------------

Immunogen	<i>E. coli</i> expressed recombinant EGFP
------------------	---

Specificity	Rabbit anti GFP antibody recognizes green fluorescent protein (GFP) and its variants. GFP is a ~27 kDa protein derived from the jellyfish <i>Aequorea victoria</i> . GFP fluoresces green (509 nm) when excited by blue light (395 nm), and is commonly used as a marker of gene expression. Rabbit anti GFP antibody is known to cross-react with enhanced green fluorescent protein (EGFP), yellow fluorescent protein (YFP) and red fluorescent protein (RFP).
Western Blotting	Rabbit anti GFP antibody recognizes a band of approximately 30-37 kDa on recombinant enhanced green fluorescent protein (EGFP). Rabbit anti GFP antibody recognizes a band of approximately 32-34 kDa on recombinant red fluorescent protein (RFP). Rabbit anti GFP antibody recognizes a band of approximately 32-34 kDa on recombinant yellow fluorescent protein (YFP).
Storage	Store at -20°C Storage in frost-free freezers is not recommended. This product should be stored undiluted. Avoid repeated freezing and thawing as this may denature the antibody. Should this product contain a precipitate we recommend microcentrifugation before use.
Guarantee	12 months from date of despatch
Acknowledgements	Proclin™ 300 is a trademark of The Dow Chemical Company ("Dow") or an affiliated company of Dow
Health And Safety Information	Material Safety Datasheet documentation #20352 available at: https://www.bio-rad-antibodies.com/SDS/AHP2984 20352
Regulatory	For research purposes only
