Specificity

Goat anti Rabbit IP-10 antibody recognizes rabbit (lapine) interferon gamma-inducible protein 10 (IP-10), also known as CXCL10, a 10.82 kDa protein belonging to the chemokine CXC family. IP-10 is expressed in a variety of tissues including liver, gut, spleen, kidney and thymus, in response to interferon gamma stimulation.

IP-10 acts as a chemoattractant for monocytes, NK cells and certain T-cells.

ELISA

This product may be used as a capture antibody in a sandwich ELISA together with [AHP2993B](#) as the detection reagent. [PRABP007](#) may be used as a standard.
