Datasheet: AHP2999 BATCH NUMBER 153406

Description:	RABBIT ANTI RPAP3
Specificity:	RPAP3
Format:	Purified
Product Type:	Polyclonal Antibody
Isotype:	Polyclonal IgG
Quantity:	50 µl

Product Details

Applications	This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit <u>www.bio-rad-antibodies.com/protocols</u> .							
		Yes	No	Not Determined	Suggested Dilution			
	Western Blotting	-			1/500 - 1/2000			
	Where this product has not been tested for use in a particular technique this does not							
	necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.							
Target Species	Human							
Species Cross Reactivity	Reacts with: Rat N.B. Antibody reactivity and working conditions may vary between species. Cross reactivity is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information.							
Product Form	Purified IgG - liquid							
Antiserum Preparatio	n Antiserum to RPAP3 was antigen	s raised by	repeate	d immunization of rab	bits with highly purified			
Buffer Solution	Phosphate buffered salin	ie						
Preservative Stabilisers	0.02% Sodium Azide 50% Glycerol							

Immunogen	Recombinant fusion protein containing a sequence corresponding to amino acids 17-241 of human RPAP3 (NP_001139547)				
External Database Links	UniProt: <u>Q9H6T3</u> <u>Related reagents</u> Entrez Gene: <u>79657</u> RPAP3 <u>Related reagents</u>				
Specificity	Rabbit anti RPAP3 antibody recognizes RNA polymerase II-associated protein 3 (RPAP3), also known as HSpagh and Tah1. It is a component of the R2TP/PFDL complex (Cloutier et al. 2009) and provides a flexible scaffold for allowing the abundant molecular chaperone HSP90 to interact with other proteins including RNA Pol II, TOR and SMG1, allowing the assembly of important cellular complexes (Martino et al. 2018). It has been suggested that RPAP3 can modulate UV-induced DNA damage (Ni et al. 2009). RPAP3 appears to bind to NEMO, inhibiting the NF-kappaB signaling pathway and enhancing cytotoxicity of the chemotherapeutic agent doxorubicin (Shimada et al. 2011).				
Storage	Store at -20°C Storage in frost-free freezers is not recommended. This product should be stored undiluted. Avoid repeated freezing and thawing as this may denature the antibody. Should this product contain a precipitate we recommend microcentrifugation before use.				
Guarantee	12 months from date of despatch				
Health And Safety Information	Material Safety Datasheet documentation #10049 available at: https://www.bio-rad-antibodies.com/SDS/AHP2999 10049				
Regulatory	For research purposes only
