

Datasheet: AHP3016 BATCH NUMBER 166874

Description:	RABBIT ANTI SARS-CoV-2 SPIKE PROTEIN S2
Specificity:	SARS-CoV-2 SPIKE PROTEIN S2
Format:	Purified
Product Type:	Polyclonal Antibody
Isotype:	IgG
Quantity:	0.1 mg

Product Details

Applications	This product has been re derived from testing with communications from the	is product has been reported to work in the following applications. This information is rived from testing within our laboratories, peer-reviewed publications or personal mmunications from the originators. Please refer to references indicated for further				
	momation. For general		comment	lations, please visit \underline{w}	<u>-010.ww</u>	
	rad-antibodies.com/protocols.					
		Yes	No	Not Determined	Suggested Dilution	
	Western Blotting	-			1 ug/ml	
	Immunofluorescence	•			10 ug/ml	
	Where this product has not been tested for use in a particular technique this necessarily exclude its use in such procedures. Suggested working dilutions a guide only. It is recommended that the user titrates the product for use in t system using appropriate negative/positive controls.					
Target Species	Viral					
Product Form	Purified IgG - liquid					
Preparation	Rabbit polyclonal antibody purified by affinity chromatography					
Buffer Solution	Phosphate buffered saline					
Preservative Stabilisers	0.02% Sodium Azide (NaN ₃)					
Approx. Protein Concentrations	1.0 mg/ml					
Immunogen	Peptide corresponding to 16 amino acids near the center terminus of SARS-CoV-2 (COVID-19) Spike glycoprotein.				of SARS-CoV-2	
	The immunogen is located within 900-950 amino acids of SARS-CoV-2 (COVID-19) Spike					

	protein.

Specificity	Rabbit anti SARS-CoV-2 spike protein S2 antibody recognizes spike glycoprotein, also known as S glycoprotein, peplomer protein and E2.					
	Human coronaviruses are pathogens that can cause severe respiratory tract infections. SARS-CoV-2 is a novel human coronavirus characterized in 2020, and causes "coronavirus disease 2019" or "COVID-19" (Xu et al. 2020). The spike glycoproteins of coronaviruses are incorporated into the viral envelope and promote entry into cells (Walls et al. 2020). The spike glycoprotein of SARS-CoV-2 is comprised of two subunits called S1 and S2. The S1 protein binds to a receptor on human cells, and the transmembrane unit S2 helps fuse the viral membrane with a cellular membrane (Hoffmann et al. 2020). Specifically, both SARS-CoV and SARS-CoV-2 spike proteins contain a receptor-binding domain (RBD) that recognize the same receptor, ACE2, on human cells (Shang et al. 2020). This antibody recognizes the spike S2 protein of SARS-CoV-2.					
Storage	This product is shipped at ambient temperature. It is recommended to aliquot and store at -20°C on receipt. When thawed, aliquot the sample as needed. Keep aliquots at 2-8°C for short term use (up to 4 weeks) and store the remaining aliquots at -20°C.					
	Avoid repeated freezing and thawing as this may denature the antibody. Storage in frost-free freezers is not recommended.					
Guarantee	12 months from date of despatch					
Health And Safety Information	Material Safety Datasheet documentation #10040 available at: https://www.bio-rad-antibodies.com/SDS/AHP3016 10040					
Regulatory	For research purposes only
