

Datasheet: AHP3021

Description:	GOAT ANTI ELF1
Specificity:	ELF1
Format:	Purified
Product Type:	Polyclonal Antibody
Isotype:	Polyclonal IgG
Quantity:	0.1 mg

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
Immunohistology - Paraffin	▪			2.5 ug/ml
Western Blotting	▪			0.03 ug/ml - 0.1 ug/ml

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.

Target Species

Human

Species Cross Reactivity

Reacts with: Mouse

N.B. Antibody reactivity and working conditions may vary between species. Cross reactivity is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information.

Product Form

Purified IgG - liquid

Antiserum Preparation

Antisera to human ELF1 were raised by repeated immunizations of goats with highly purified antigen. Purified IgG was prepared by affinity chromatography.

Buffer Solution

TRIS buffered saline

Preservative Stabilisers

0.02% Sodium Azide
0.5% Bovine Serum Albumin

Approx. Protein

IgG concentration 0.5 mg/ml

Concentrations

Immunogen Peptide with sequence C-AMKQNELLEPNSF, from the C Terminus of the protein sequence according to NP_758961.1; NP_001138825.1

Specificity

Goat anti ELF1 antibody recognizes ETS-related transcription factor Elf-1, also known as E74-like factor 1 (ELF1).

ELF1 is a small zinc-finger protein conserved in eukaryotes and some archaea ([Ehara and Sekine 2018](#)). ELF1 is ubiquitously expressed in human cells and is a member of the ETS family of transcription factors ([Budka et al. 2018](#)) and appears to act downstream of the DNA damage response pathway ([Cheng et al. 2020](#)). In cancer, ELF1 appears to have oncogenic and tumor suppressive functions depending on context ([Budka et al. 2018](#)). ELF1 appears to play an antiviral role, with lower levels of ELF1 reducing host defense against the influenza A virus ([Seifert et al. 2019](#)).

Western Blotting

Goat anti Human ELF1 antibody detects a band of approximately 70 kDa in cell lysates

Storage

Store at -20°C only.

This product should be stored undiluted. Avoid repeated freezing and thawing as this may denature the antibody. Storage in frost-free freezers is not recommended. Should this product contain a precipitate we recommend microcentrifugation before use.

Guarantee

12 months from date of despatch
