

Datasheet: AHP3026

Description:	RABBIT ANTI HUMAN ATAD2
Specificity:	ATAD2
Format:	Purified
Product Type:	Polyclonal Antibody
Isotype:	Polyclonal IgG
Quantity:	0.1 ml

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
Immunoprecipitation	▪			5 µl per IP - 10 µl per IP
Western Blotting	▪			1/500 - 1/2000

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.

Target Species Human

Product Form Purified IgG - liquid

Antiserum Preparation Antiserum to human ATAD2 was raised by repeated immunization of rabbits with highly purified antigen. Purified IgG was prepared from whole serum by affinity chromatography.

Buffer Solution Phosphate buffered saline

Preservative 0.035% Sodium Azide (NaN₃)
Stabilisers 30% Glycerol

Carrier Free Yes

Immunogen A peptide within the C-terminal region of human ATAD2

Specificity **Rabbit anti Human ATAD2 antibody** recognizes ATPase family AAA domain-containing protein 2.

ATAD2 is a 159 kDa member of the AAA ATPase family of proteins. AAA ATPases regulate gene expression and are frequently dysregulated in multiple myeloma and other cancers. ATAD2 selectively binds to acetylated histone 4 and has been shown to regulate a number of cellular processes including cell proliferation. ATAD2 has also been shown to contribute to tumor progression in several cancers including hepatocellular carcinoma ([Lu et al. 2015](#)).

Storage This product is shipped at ambient temperature. It is recommended to aliquot and store at -20°C on receipt. When thawed, aliquot the sample as needed. Keep aliquots at 2-8°C for short term use (up to 4 weeks) and store the remaining aliquots at -20°C.

Avoid repeated freezing and thawing as this may denature the antibody. Storage in frost-free freezers is not recommended. Should this product contain a precipitate we recommend microcentrifugation before use.

Guarantee 12 months from date of despatch
