Datasheet: AHP3033 BATCH NUMBER 168986

Description:	RABBIT ANTI HUMAN CENP-A (pSer18)
Specificity:	CENP-A (pSer18)
Format:	Purified
Product Type:	Polyclonal Antibody
Isotype:	Polyclonal IgG
Quantity:	0.1 ml

Product Details

Applications	This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit <u>www.bio-rad-antibodies.com/protocols</u> .							
	· · · · ·	Yes	No	Not Determined	Suggested Dilution			
	Western Blotting	•			1/100 - 1/500			
	Immunofluorescence	-			1/100			
	Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.							
Target Species	Human							
Product Form	Purified IgG - liquid							
Antiserum Preparatio	n Antiserum to human CEI with highly purified antige chromatography.							
Buffer Solution	Phosphate buffered salir	ie						
Preservative Stabilisers	0.035% Sodium Azide (N 30% Glycerol	NaN ₃)						
Carrier Free	Yes							
Immunogen	A synthetic peptide conta	aining pho	sphoryla	ted serine 16 and 18 c	of human CENP-A

Specificity	Rabbit anti human CENP-A (pSer18) antibody recognizes centromere protein A when phosphorylated at serine 18.				
	CENP-A is a histone H3 variant which replaces one or both canonical H3 histones in a subset of nucleosomes within centromeric chromatin and epigenetically determines the position of the centromere on each chromosome, and where kinetochore assembly and sister chromatid cohesion occurs during mitosis (Fachinetti <i>et al.</i> 2013) (Blower <i>et al.</i> 2002). CENP-A has been shown to interact directly with the inner kinetochore through CENP-C and CENP-N. This interaction allows microtubules to accurately segregate chromosomes during mitosis (Kixomoeller <i>et al.</i> 2020) (Yan <i>et al.</i> 2019). Phosphorylation of CENP-A on serine 18 is thought to play an important role in the segregation of chromosomes during mitosis (Kixomoeller <i>et al.</i> 2020) (Zhang <i>et al.</i> 2017).				
	Rabbit anti human CENP-A (pSer18) antibody shows minimal cross-reactivity with CENP-A that has been phosphorylated at serine 16.				
Storage	This product is shipped at ambient temperature. It is recommended to aliquot and store at -20°C on receipt. When thawed, aliquot the sample as needed. Keep aliquots at 2-8°C for short term use (up to 4 weeks) and store the remaining aliquots at -20°C.				
	Avoid repeated freezing and thawing as this may denature the antibody. Storage in frost-free freezers is not recommended. Should this product contain a precipitate we recommend microcentrifugation before use.				
Guarantee	12 months from date of despatch				
Health And Safety Information	Material Safety Datasheet documentation #10049 available at: https://www.bio-rad-antibodies.com/SDS/AHP3033 10049				
Regulatory	For research purposes only
