**Specificity**

**Rabbit anti Mouse CXXC4 antibody** recognizes CXXC finger protein 4, also known as inhibition of the DVL and axin complex protein.

CXXC4 is a 36 kDa protein that acts as a negative regulator of the Wnt signaling pathway through its interaction with dishevelled (DVL1). CXXC4 is thought to regulate DNA demethylation. Inhibition of CXXC4 has been linked to various cancers, including malignant renal cell carcinoma ([Kojima \*et al.\* 2009](#)).

**Storage**

This product is shipped at ambient temperature. It is recommended to aliquot and store at -20°C on receipt. When thawed, aliquot the sample as needed. Keep aliquots at 2-8°C for short term use (up to 4 weeks) and store the remaining aliquots at -20°C.

Avoid repeated freezing and thawing as this may denature the antibody. Storage in frost-free freezers is not recommended. Should this product contain a precipitate we recommend microcentrifugation before use.
