

Datasheet: AHP3082

BATCH NUMBER 160772

Description:	RABBIT ANTI HUMAN KMT2E
Specificity:	KMT2E
Format:	Purified
Product Type:	Polyclonal Antibody
Isotype:	Polyclonal IgG
Quantity:	0.1 ml

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
Western Blotting	▪			1/500 - 1/2000

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.

Target Species

Human

Species Cross Reactivity

Reacts with: Mouse

N.B. Antibody reactivity and working conditions may vary between species. Cross reactivity is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information.

Product Form

Purified IgG - liquid

Antiserum Preparation

Antiserum to human KMT2E was raised by repeated immunization of rabbits with highly purified antigen. Purified IgG was prepared from whole serum by affinity chromatography.

Buffer Solution

Phosphate buffered saline

Preservative Stabilisers

0.035% Sodium Azide (NaN₃)
30% Glycerol

Carrier Free	Yes
Immunogen	A peptide within human KMT2E
External Database Links	<p>UniProt: Q8IZD2 Related reagents</p> <p>Entrez Gene: 55904 MLL5 Related reagents</p>
Synonyms	KMT2E
Specificity	<p>Rabbit anti Human KMT2E antibody recognizes lysine methyltransferase 2E, otherwise known as MLL5.</p> <p>KMT2E is a member of the myeloid/lymphoid or mixed-lineage leukemia (MLL) family of proteins, a group of proteins that are homologous to the evolutionary conserved trithorax group crucial for the regulation of homeotic gene (HOX) expression and embryonic development (Zhang et al. 2017). Aberrant levels of KMT2E have been shown to inhibit cell cycle progression. Mutations in the KMT2E gene have also been associated with neurological disorders such as epilepsy and autism as well as abnormalities in gastrointestinal function (O'Donnell-Luria et al. 2019).</p>
Storage	<p>This product is shipped at ambient temperature. It is recommended to aliquot and store at -20°C on receipt. When thawed, aliquot the sample as needed. Keep aliquots at 2-8°C for short term use (up to 4 weeks) and store the remaining aliquots at -20°C.</p> <p>Avoid repeated freezing and thawing as this may denature the antibody. Storage in frost-free freezers is not recommended. Should this product contain a precipitate we recommend microcentrifugation before use.</p>
Guarantee	12 months from date of despatch
Health And Safety Information	Material Safety Datasheet documentation #10049 available at: https://www.bio-rad-antibodies.com/SDS/AHP3082 10049
Regulatory	For research purposes only
