

Datasheet: AHP3088

Description:	RABBIT ANTI HUMAN NKX2.5
Specificity:	NKX2.5
Format:	Purified
Product Type:	Polyclonal Antibody
Isotype:	Polyclonal IgG
Quantity:	0.1 ml

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
Western Blotting	▪			1/500 - 1/1000

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.

Target Species	Human
Product Form	Purified IgG - liquid
Antiserum Preparation	Antiserum to human NKX2.5 was raised by repeated immunization of rabbits with highly purified antigen. Purified IgG was prepared from whole serum by affinity chromatography.
Buffer Solution	Phosphate buffered saline
Preservative	0.035% Sodium Azide (NaN ₃)
Stabilisers	30% Glycerol
Carrier Free	Yes
Immunogen	A peptide within the N-terminal region of human NKX2.5

Synonyms CSX, NKX2.5, NKX2E

Specificity **Rabbit anti Human NKX2.5 antibody** recognizes homeobox protein NKX-2.5.

Homeobox protein NKX-2.5 is a protein encoded by the *NKX2.5* gene. Homeobox-containing genes such as *NKX2.5* encode for numerous transcription factors that go on to aid in the development of many structures including the heart ([Bartlett et al. 2010](#)). NKX2.5 expression is crucial for the development of atrial, ventricular, and conotruncal septation as well as the atrioventricular (AV) valve and the maintenance of AV conduction. Mutations in the *NKX2.5* gene have been linked to congenital heart disease (CHD) ([Wang et al. 2017](#)).

Storage This product is shipped at ambient temperature. It is recommended to aliquot and store at -20°C on receipt. When thawed, aliquot the sample as needed. Keep aliquots at 2-8°C for short term use (up to 4 weeks) and store the remaining aliquots at -20°C.

Avoid repeated freezing and thawing as this may denature the antibody. Storage in frost-free freezers is not recommended. Should this product contain a precipitate we recommend microcentrifugation before use.

Guarantee 12 months from date of despatch
