

Datasheet: AHP3091

Description:	RABBIT ANTI HUMAN PAX5
Specificity:	PAX5
Format:	Purified
Product Type:	Polyclonal Antibody
Isotype:	Polyclonal IgG
Quantity:	0.1 ml

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
Western Blotting	▪			1/500 - 1/2000

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.

Target Species	Human
Product Form	Purified IgG - liquid
Antiserum Preparation	Antiserum to human PAX5 was raised by repeated immunization of rabbits with highly purified antigen. Purified IgG was prepared from whole serum by affinity chromatography.
Buffer Solution	Phosphate buffered saline
Preservative Stabilisers	0.035% Sodium Azide (NaN ₃) 30% Glycerol
Carrier Free	Yes
Immunogen	A peptide within the N-terminal region of human PAX5

Specificity **Rabbit anti Human PAX5 antibody** recognizes paired box protein PAX5, also known as B-cell lineage specific activator protein (BSAP).

PAX5 is a member of the paired box (PAX) family of transcription factors and is encoded by the *PAX5* gene. PAX proteins contain a highly conserved DNA-binding domain, known as the paired box, and are important in the early stages of development. PAX5 is expressed during early stages of B-cell differentiation. Expression of PAX5 has also been observed in tissue from developing brain, spinal cord and testis, suggesting that PAX5 may play an important role in neural development and spermatogenesis ([Adams *et al.* 1992](#)).

Storage This product is shipped at ambient temperature. It is recommended to aliquot and store at -20°C on receipt. When thawed, aliquot the sample as needed. Keep aliquots at 2-8°C for short term use (up to 4 weeks) and store the remaining aliquots at -20°C.

Avoid repeated freezing and thawing as this may denature the antibody. Storage in frost-free freezers is not recommended. Should this product contain a precipitate we recommend microcentrifugation before use.

Guarantee 12 months from date of despatch
