

## Datasheet: AHP385HT

<b>Description:</b>	RABBIT ANTI S100 PROTEIN
<b>Specificity:</b>	S100
<b>Format:</b>	Ready To Use
<b>Product Type:</b>	Polyclonal Antibody
<b>Isotype:</b>	Polyclonal IgG
<b>Quantity:</b>	1 ml

## Product Details

### Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit [www.bio-rad-antibodies.com/protocols](http://www.bio-rad-antibodies.com/protocols).

	Yes	No	Not Determined	Suggested Dilution
Immunohistology - Frozen	▪			Neat
Immunohistology - Paraffin	▪			Neat

Where this antibody has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the antibody for use in their own system using appropriate negative/positive controls.

### Target Species

Bovine

### Species Cross Reactivity

Reacts with: Mouse, Human, Rat, Western grey kangaroo

**N.B.** Antibody reactivity and working conditions may vary between species. Cross reactivity is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information.

### Product Form

Purified IgG - liquid, ready to use

**Antiserum Preparation** Purified IgG was prepared from whole serum by affinity chromatography.

### Buffer Solution

Phosphate buffered saline

### Preservative Stabilisers

0.1% Sodium Azide  
1% Bovine Serum Albumin

### Immunogen

Bovine brain S-100.

<b>Specificity</b>	<p><b>Rabbit anti S100 Protein antibody</b> reacts with human S-100 A and S-100 B. S100 is present in brain glial cells and in ependymal cells. Rabbit anti S100 Protein antibody also labels Schwann cells of the peripheral nervous system.</p> <p>Among tumours of the human central and peripheral nervous systems, schwannomas, ependymomas and astroglomas of different stages, including glioblastomas show positive reactions. S100 can be detected in almost all benign naevi and malignant melanocytic tumours of the skin and in Langerhans cells in the skin.</p>
<b>Immunohistology</b>	This product does not require protein digestion pre-treatment of paraffin sections. This product does not require antigen retrieval using heat treatment prior to staining of paraffin sections.
<b>Histology Positive Control Tissue</b>	Brain, skin or human melanoma
