Where this antibody has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the antibody for use in their own system using appropriate negative/positive controls.

(1) This product requires antigen retrieval using heat treatment prior to staining of paraffin sections. Sodium citrate buffer pH 6.0 is recommended for this purpose.

Specificity	Rabbit anti Apaf1 antibody recognizes Apaf1 (Apoptosis protease activating factor 1), the mammalian homologue of the CED-4 cell death protein in <i>C. elegans</i> . Apaf1 binds to cytochrome C and caspase-9 leading to caspase-9 activation, resulting in the beginning of the proteolytic cascade characteristic of apoptosis. Apaf1 can also associate with caspase-4 and caspase-8. Rabbit anti Apaf1 antibody recognizes a ~130 kDa band in western blots.
