

Datasheet: AHP538 BATCH NUMBER 162787

Description:	RABBIT ANTI AMYLOID PRECURSOR PROTEIN (C-TERMINAL)		
Specificity:	AMYLOID PRECURSOR PROTEIN (C-TERMINAL)		
Other names:	APP		
Format:	Purified		
Product Type:	Polyclonal Antibody		
lsotype:	Polyclonal IgG		
Quantity:	0.1 mg		

Product Details

Applications	This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit <u>www.bio-rad-antibodies.com/protocols</u> .						
		Yes	No	Not Determined	Suggested Dilution

	ELISA						
	Immunoprecipitation						
	Western Blotting	-			1/500 - 1/1000		
	Where this antibody has	Where this antibody has not been tested for use in a particular technique this does not					
	necessarily exclude its us	necessarily exclude its use in such procedures. Suggested working dilutions are given as					
	a guide only. It is recommended that the user titrates the antibody for use in their own system using appropriate negative/positive controls.						
							(1)This product require paraffin section
	Species Cross Reactivity	Reacts with: Human, Rat, Mouse N.B. Antibody reactivity and working conditions may vary between species. Cross reactivity is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information.					
Product Form	Purified IgG - liquid						

Antiserum Preparation Antisera to APP were raised by repeated immunisation of rabbits with highly purified

Buffer Solution	Phosphate buffered saline				
Preservative Stabilisers	0.02% Sodium Azide				
Approx. Protein Concentrations	IgG concentration 1.0 mg/ml				
Immunogen	Synthetic peptide corresponding to amino acids 737-751 of human APP.				
External Database Links	UniProt: P05067 Related reagents Entrez Gene: 351 APP Related reagents				
Synonyms	A4, AD1				
RRID	AB_321972				
Specificity	Rabbit anti Amyloid Precursor Protein antibody recognizes both intact Amyloid Precursor Protein (APP), and also the C99 fragment generated by beta-secretase. The sequence recognized by this antibody corresponds to amino acids 85-99 of the C99 fragment. The C99 fragment itself is a substrate for gamma-secretase to generate the 4 kDa beta amyloid peptide, found in the brains of Alzheimer's disease patients. APP also inhibits Notch signaling through it's interaction with NUMB (<u>Roncarati <i>et al.</i></u> 2002). Rabbit anti Amyloid Precursor Protein antibody has been used successfully for the detection of the ~14 kDa β C-terminal fragment of APP, produced as a result of cleavage by BACE1 using western blotting -in rat retinal lysates (<u>Huang <i>et al.</i>2012</u>).

antigen. Purified IgG was prepared by affinity chromatography.

Health And Safety Information	Material Safety Datasheet documentation #10040 available at: https://www.bio-rad-antibodies.com/SDS/AHP538 10040
Guarantee	12 months from date of despatch
	Avoid repeated freezing and thawing as this may denature the antibody. Storage in frost-free freezers is not recommended.
Storage	This product is shipped at ambient temperature. It is recommended to aliquot and store at -20°C on receipt. When thawed, aliquot the sample as needed. Keep aliquots at 2-8°C for short term use (up to 4 weeks) and store the remaining aliquots at -20°C.
