Where this antibody has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the antibody for use in their own system using appropriate negative/positive controls.

(1) This product requires antigen retrieval using heat treatment prior to staining of paraffin sections. Sodium citrate buffer pH 6.0 is recommended for this purpose.

Specificity	Rabbit anti Mouse CIDE-A antibody recognizes murine CIDE-A (cell death inducing DFF-like effector A) protein with homology to the N-terminal region of DFF-45 (ICAD). CIDE-A expression activates apoptosis in mammalian cells, which is inhibited by DFF-45. Rabbit anti Mouse CIDE-A antibody (AHP541) recognizes an epitope within the C terminal region of CIDE-A and does not cross react with CIDE-B.
Histology Positive Control Tissue	Mouse heart
