Where this antibody has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the antibody for use in their own system using appropriate negative/positive controls.

(1) This product requires antigen retrieval using heat treatment prior to staining of paraffin sections. Sodium citrate buffer pH 6.0 is recommended for this purpose.

Target Species	Mouse
Species Cross Reactivity	Reacts with: Human, Rat N.B. Antibody reactivity and working conditions may vary between species. Cross reactivity is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Product Form	Purified IgG - liquid

Antiserum Preparation Antisera to mouse caspase 12 were raised by repeated immunisation of rabbits with highly purified antigen. Purified IgG was prepared from whole serum by affinity

chromatography.

Specificity	Rabbit anti caspase-12 (aa12-17) polyclonal antibody recognizes an epitope within the N-terminal region of murine caspase 12. Caspase 12 is a member of the interleukin-1 Beta converting enzyme (ICE) subfamily of caspases. Caspase 12 is ubiquitously expressed in murine tissue and is localised to the endoplasmic reticulum.
Histology Positive Control Tissue	Heart tissue.
