

Datasheet: AHP635

**BATCH NUMBER 162973**

|                      |                                     |
|----------------------|-------------------------------------|
| <b>Description:</b>  | RABBIT ANTI RAT CALCITONIN RECEPTOR |
| <b>Specificity:</b>  | CALCITONIN RECEPTOR                 |
| <b>Format:</b>       | Purified                            |
| <b>Product Type:</b> | Polyclonal Antibody                 |
| <b>Isotype:</b>      | Polyclonal IgG                      |
| <b>Quantity:</b>     | 0.1 mg                              |

## Product Details

### Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit [www.bio-rad-antibodies.com/protocols](http://www.bio-rad-antibodies.com/protocols).

|                                | Yes | No | Not Determined | Suggested Dilution  |
|--------------------------------|-----|----|----------------|---------------------|
| Flow Cytometry                 |     |    | ▪              |                     |
| Immunohistology - Frozen       | ▪   |    |                | 1/500               |
| Immunohistology - Paraffin (1) | ▪   |    |                | 1/1000 - 1/5000     |
| ELISA                          | ▪   |    |                | 1/100,000           |
| Immunoprecipitation            |     |    | ▪              |                     |
| Western Blotting               | ▪   |    |                | Reducing conditions |
| Immunofluorescence             | ▪   |    |                |                     |

Where this antibody has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. It is recommended that the user titrates the antibody for use in their own system using appropriate negative/positive controls.

**(1)The use of 4% paraformaldehyde fixation, rather than formalin fixation is recommended.**

**A sensitive detection system is also recommended. e.g. A catalysed signal amplification system.**

### Target Species

Rat

### Species Cross Reactivity

Reacts with: Mouse, Human, Fish, Atlantic Stingray

**N.B.** Antibody reactivity and working conditions may vary between species. Cross reactivity is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information.

|--|---|
| <b>Product Form</b>                      | Purified IgG - liquid   |
| <b>Antiserum Preparation</b>             | Antisera to calcitonin receptor were raised by repeated immunisations of rabbits with highly purified antigen. Purified IgG was prepared from whole serum by affinity chromatography on Protein A.  |
| <b>Buffer Solution</b>                   | Phosphate buffered saline   |
| <b>Preservative Stabilisers</b>          | <0.1% Sodium Azide (NaN <sub>3</sub> )  |
| <b>Approx. Protein Concentrations</b>    | IgG concentration 1.0 mg/ml   |
| <b>Immunogen</b>                         | Synthetic peptide derived from a C-terminal sequence of rat calcitonin receptor.  |
| <b>External Database Links</b>           | <p><b>UniProt:</b><br/> <a href="#">P32214</a>    <a href="#">Related reagents</a></p> <p><b>Entrez Gene:</b><br/> <a href="#">116506</a>    Calcrc    <a href="#">Related reagents</a></p>   |
| <b>RRID</b>                              | AB_2068967  |
| <b>Specificity</b>                       | <p><b>Rabbit anti Rat Calcitonin Receptor antibody</b> recognizes the calcitonin receptor in human, mouse and rat. The calcitonin receptor is a seven transmembrane domain cell surface protein which is coupled to G protein messenger systems. Rabbit anti Rat Calcitonin Receptor antibody recognizes an epitope within the cytoplasmic domain that is common to both C1a and C1b rat isoforms.</p> <p>Calcitonin receptor is expressed in kidney, central and peripheral nervous systems and in osteoclasts. It is also expressed in a number of tissues during the development of the embryo and may be important in foetal morphogenesis.</p>   |
| <b>Histology Positive Control Tissue</b> | Kidney, cultured osteoclasts  |

---

**Storage** This product is shipped at ambient temperature. It is recommended to aliquot and store at -20°C on receipt. When thawed, aliquot the sample as needed. Keep aliquots at 2-8°C for short term use (up to 4 weeks) and store the remaining aliquots at -20°C.

Avoid repeated freezing and thawing as this may denature the antibody. Storage in frost-free freezers is not recommended.

---

**Guarantee** 12 months from date of despatch

---

**Health And Safety Information** Material Safety Datasheet documentation #10040 available at: 10040: <https://www.bio-rad-antibodies.com/uploads/MSDS/10040.pdf>

---

**Regulatory** For research purposes only

---
