Where this antibody has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the antibody for use in their own system using appropriate negative/positive controls.

(1)This product requires antigen retrieval using heat treatment prior to staining of paraffin sections.

TRIS/EDTA buffer pH 9.0 is recommended for this purpose.

Specificity	<p>Goat anti Human CSK antibody recognizes an epitope within the C-terminal (CT) region of CSK, also known as c-src tyrosine kinase, Tyrosine-protein kinase CSK, p50^{CSK} or Protein-tyrosine kinase CYL. CSK is a cytoplasmic tyrosine kinase ubiquitously expressed as two mRNA species (Partanen et al. 1991), which down-regulates the activity of the c-src oncoprotein (Chong et al. 2005).</p> <p>CSK is expressed in lung tissues and by macrophages and is highly conserved across species suggesting a role in important regulatory functions (Bräuninger et al. 1992).</p>
Histology Positive Control Tissue	Human Tonsil
Western Blotting	AHP733 detects a band of approximately 50kDa in Jurkat cell lysates.
Storage	<p>This product is shipped at ambient temperature. It is recommended to aliquot and store at -20°C on receipt. When thawed, aliquot the sample as needed. Keep aliquots at 2-8°C for short term use (up to 4 weeks) and store the remaining aliquots at -20°C.</p> <p>Avoid repeated freezing and thawing as this may denature the antibody. Storage in frost-free freezers is not recommended.</p>
Guarantee	12 months from date of despatch
