Specificity	<p>Rabbit anti Human CXCL13 antibody recognizes human BCA-1 (B cell attractant chemokine), a 10.1 kDa CXC cytokine designated CXCL13, a potent chemoattractant for B lymphocytes expressed at high levels in the liver and to a lesser extent by lymph nodes, spleen, stomach, appendix and salivary glands.</p> <p>BCA-1 functions as a ligand for Burkitt's lymphoma receptor 1 (BLR-1), a chemokine receptor designated CXCR5, expressed by all mature B lymphocytes.</p>
ELISA	This purified human CXCL13 antibody may be used in an indirect ELISA or as the capture reagent in a sandwich ELISA with our biotinylated human CXCL13 antibody (AHP766B) as the detection reagent and recombinant human CXCL13 (PHP129) as the standard.

Storage	<p>Prior to reconstitution store at -20°C. After reconstitution store at -20°C.</p> <p>This product should be stored undiluted. Storage in frost-free freezers is not recommended. Avoid repeated freezing and thawing as this may denature the antibody. Should this product contain a precipitate we recommend microcentrifugation before use.</p>
