

Datasheet: AHP784B

Description:	RABBIT ANTI HUMAN MCP-1:Biotin
Specificity:	MCP-1
Other names:	CCL2
Format:	Biotin
Product Type:	Polyclonal Antibody
Isotype:	Polyclonal IgG
Quantity:	50 µg

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
Flow Cytometry			▪	
Immunohistology - Frozen			▪	
Immunohistology - Paraffin			▪	
ELISA	▪			0.25 - 1.0ug/ml
Immunoprecipitation			▪	
Western Blotting	▪			0.1 - 0.2ug/ml

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.

Target Species	Human
Product Form	Purified IgG conjugated to Biotin - lyophilised
Reconstitution	Reconstitute with 0.5ml sterile PBS containing 1% Bovine Serum Albumin. Care should be taken during reconstitution as the protein may appear as a film at the bottom of the vial. Bio-Rad recommend that the vial is gently mixed after reconstitution. For long term storage the addition of 0.09% sodium azide is recommended.
Antiserum Preparation	Antisera to human MCP-1 were raised by repeated immunisations of rabbits with highly purified antigen. Purified IgG prepared by affinity chromatography.
Buffer Solution	Phosphate buffered saline

Preservative Stabilisers	None present.
Carrier Free	Yes
Approx. Protein Concentrations	IgG concentration 0.1 mg/ml after reconstitution.
Immunogen	Recombinant human MCP-1 (PHP061).
External Database Links	<p>UniProt: P13500 Related reagents</p> <p>Entrez Gene: 6347 CCL2 Related reagents</p>
Synonyms	MCP1, SCYA2
RRID	AB_2071555
Specificity	<p>Rabbit anti Human MCP-1 antibody recognizes human MCP-1 (Monocyte Chemoattractant Protein 1), otherwise known as CCL2, a 76 amino acid CC chemokine which acts as a chemoattractant for monocytes, basophils, activated T cells and NK cells, through binding with the seven-transmembrane G protein-coupled receptor, CCR2.</p> <p>The recruitment of mononuclear cells by MCP-1, has established this chemokine as an important factor in innate immunity, implicated in the pathogenesis of inflammatory diseases such as rheumatoid arthritis, multiple sclerosis, uveitis and bronchial asthma. Increasing studies have also linked MCP-1 with the polarization of activated T cells into the T helper 2 (Th2) subset, revealing a role for MCP-1 in the adaptive immune response.</p> <p>Rabbit anti Human MCP-1 antibody has been successfully used as a detection reagent in the development of a sensitive ELISA assay for the evaluation of MCP-1 expression in conjunction with Mouse anti Human MCP-1, clone 2.2-4A4-1A11 (MCA2486) and recombinant human MCP-1 (PHP061) as a calibration reagent.</p>
ELISA	This product may be used in a direct ELISA or as a detection reagent in a sandwich ELISA together with either AHP784 or MCA2486 as the capture reagent and PHP061 as the standard
Western Blotting	This product may be used under either reducing or non-reducing conditions with PHP061 as the positive control.
Further Reading	1. Banisor, I. <i>et al.</i> (2005) Involvement of beta-chemokines in the development of inflammatory demyelination. J Neuroinflammation. 2 (1): 7.
Storage	Prior to reconstitution store at -20°C. After reconstitution store at -20°C.

This product should be stored undiluted. Storage in frost-free freezers is not recommended. Avoid repeated freezing and thawing as this may denature the antibody. Should this product contain a precipitate we recommend microcentrifugation before use.

Guarantee 12 months from date of despatch
