<b>Specificity</b>	<p><b>Rabbit anti Human ACE2 antibody</b> recognizes human Angiotensin-converting enzyme 2, also known as ACE2, ACE-related carboxypeptidase or Metalloprotease MPROT15. ACE2 is a 788 amino acid ~100 kDa carboxypeptidase expressed in a range of tissues including heart, kidney, testis and the gastrointestinal system.</p> <p>ACE2 is a homologue of ACE (Angiotensin-converting enzyme 1), although it has a distinct catalytic activity. ACE2 catalyzes the cleavage of active angiotensin II into angiotensin 1-7, which may counteract the effects of ACE by increasing vasodilatation.</p> <p>ACE2 serves as the cellular entry point for the severe acute respiratory syndrome (SARS) virus, functioning as a receptor for the SARS Spike protein (<a href="#">Turner et al. 2004</a>).</p>
<b>Storage</b>	<p>This product is shipped at ambient temperature. It is recommended to aliquot and store at -20°C on receipt. When thawed, aliquot the sample as needed. Keep aliquots at 2-8°C for short term use (up to 4 weeks) and store the remaining aliquots at -20°C.</p> <p>Avoid repeated freezing and thawing as this may denature the antibody. Storage in frost-free freezers is not recommended.</p>
