

Datasheet: AHP929

BATCH NUMBER 151580

| | |
|----------------------|---|
| Description: | RABBIT ANTI GLYCINE RECEPTOR ALPHA 1/2 (N-TERMINAL) |
| Specificity: | GLYCINE RECEPTOR ALPHA 1/2 (N-TERMINAL) |
| Format: | Purified |
| Product Type: | Polyclonal Antibody |
| Isotype: | Polyclonal IgG |
| Quantity: | 0.2 mg |

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

| | Yes | No | Not Determined | Suggested Dilution |
|----------------------------|-----|----|----------------|--------------------|
| Flow Cytometry | | | ▪ | |
| Immunohistology - Frozen | ▪ | | | 1/1000 |
| Immunohistology - Paraffin | | | ▪ | |
| ELISA | | | ▪ | |
| Immunoprecipitation | | | ▪ | |
| Western Blotting | ▪ | | | 1/1000 |

Where this antibody has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the antibody for use in their own system using appropriate negative/positive controls.

Target Species

Rat

Species Cross Reactivity

Reacts with: Mouse, Human

N.B. Antibody reactivity and working conditions may vary between species. Cross reactivity is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information.

Product Form

Purified IgG - lyophilized

Reconstitution

Reconstitute with 0.1 ml sterile PBS

Care should be taken during reconstitution as the protein may appear as a film at the bottom of the vial. Bio-Rad recommend that the vial is gently mixed after reconstitution. For long term storage the addition of 0.09% sodium azide is recommended.

| | |
|---------------------------------|--|
| Antiserum Preparation | Antisera to rat glycine receptor (NT) were raised by repeated immunisations of rabbits with highly purified antigen. Purified IgG prepared by affinity chromatography. |
| Buffer Solution | None present |
| Preservative Stabilisers | None present |
| Immunogen | Synthetic peptide corresponding to the N-terminal region of rat glycine receptor alpha 1 subunit. |
| External Database Links | <p>UniProt:</p> <p>P07727 Related reagents</p> <p>P22771 Related reagents</p> <p>Entrez Gene:</p> <p>25674 Glra1 Related reagents</p> <p>24397 Glra2 Related reagents</p> |
| Synonyms | Glyr |
| RRID | AB_566989 |
| Specificity | <p>Rabbit anti glycine receptor recognises an epitope within the N-terminal region (NT) of glycine receptor alpha 1 and alpha 2 subunits.</p> <p>Glycine receptors are members of the ligand-gated ion channel superfamily, which mediate fast inhibitory neurotransmission. The receptors are pentameric membrane proteins which form chloride channels. Binding of glycine to its receptor produces an increase in chloride conductance and membrane hyperpolarisation.</p> <p>Four genes encoding glycine receptor alpha subunits have been identified, together with a single beta polypeptide. Each subunit consists of a large extracellular N-terminal region, four transmembrane domains, and a large cytoplasmic domain.</p> |
| Western Blotting | AHP929 detects a band of approximately 48 kDa in rat spinal cord lysates. |
| References | 1. Chen, Z. <i>et al.</i> (2004) Molecular determinants of proton modulation of glycine receptors. J Biol Chem. 279 (2): 876-83. |
| Storage | <p>Prior to reconstitution store at +4°C.</p> <p>After reconstitution store at -20°C.</p> <p>Storage in frost-free freezers is not recommended. Avoid repeated freezing and thawing as this may denature the antibody. Should this product contain a precipitate we recommend microcentrifugation before use.</p> |
| Guarantee | 12 months from date of despatch |
