

Datasheet: AHP931 BATCH NUMBER 168817

Description:	RABBIT ANTI TYROSINE HYDROXYLASE
Specificity:	TYROSINE HYDROXYLASE
Format:	Purified
Product Type:	Polyclonal Antibody
Isotype:	Polyclonal IgG
Quantity:	0.1 ml

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
Flow Cytometry			•	
Immunohistology - Frozen	-			1/1000
Immunohistology - Paraffin	-			
ELISA			•	
Immunoprecipitation			•	
Western Blotting	-			1/1000
Immunofluorescence				1/1000

Where this antibody has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the antibody for use in their own system using appropriate negative/positive controls.

Target Species	Rat
Species Cross Reactivity	Reacts with: Grasshopper (Gastrimargus musicus), Rat, Mouse Based on sequence similarity, is expected to react with:Mammals N.B. Antibody reactivity and working conditions may vary between species. Cross reactivity is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information.
Product Form	Purified IgG - liquid

Antiserum Preparation Antisera to tyrosine hydroxylase were raised by repeated immunisations of rabbits with highly purified antigen. Purified IgG prepared by affinity chromatography.

Buffer Solution	10mM HEPES pH7.5
Preservative	0.09% Sodium Azide
Stabilisers	0.01% Bovine Serum Albumin
	50% Glycerol
Immunogen	Tyrosine hydroxylase purified from pheochromocytoma.

Specificity	Rabbit anti Rat tyrosine hydroxylase antibody recognizes tyrosine hydroxylase (TH).
	Tyrosine hydroxylase catalyses the rate-limiting step in the biosynthetic pathway of the
	catecholamines dopamine (DA), norepinephrine, and epinephrine. The enzyme exists as a
	tetramer, with each subunit composed of an N-terminal regulatory domain and a
	C-terminal catalytic domain.
	Tyrosine hydroxylase is regularly used as a marker for dopaminergic neurons, which is particularly relevant for research into Parkinson's disease (<u>Haavik <i>et al.</i> 1998</u>).
Western Blotting	AHP931 detects a band of approximately 60kDa in rat caudate cell lysates.

Storage	This product is shipped at ambient temperature. It is recommended to aliquot and store at
	-20°C on receipt. When thawed, aliquot the sample as needed. Keep aliquots at 2-8°C for
	short term use (up to 4 weeks) and store the remaining aliquots at -20°C.
	Short torm 400 (up to 4 wooks) and store the formaling anquote at -20 O.

Avoid repeated freezing and thawing as this may denature the antibody. Storage in

frost-free freezers is not recommended.

Guarantee	12 months from date of despatch
Health And Safety Information	Material Safety Datasheet documentation #10088 available at: https://www.bio-rad-antibodies.com/SDS/AHP931 10088
Regulatory	For research purposes only
