

Datasheet: AHP941Z

Description:	RABBIT ANTI CHICKEN INTERLEUKIN-1 BETA:Preservative Free
Specificity:	IL-1 BETA
Format:	Preservative Free
Product Type:	Polyclonal Antibody
Isotype:	Polyclonal IgG
Quantity:	0.5 mg

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
Flow Cytometry			▪	
Immunohistology - Frozen			▪	
Immunohistology - Paraffin			▪	
ELISA	▪			
Immunoprecipitation			▪	
Western Blotting	▪			
Functional Assays	▪			

Where this antibody has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the antibody for use in their own system using appropriate negative/positive controls.

Target Species Chicken

Product Form Purified IgG - liquid

Antiserum Preparation Antisera to chicken Interleukin-1 β were raised by repeated immunisations of rabbits with highly purified antigen. Purified IgG prepared by affinity chromatography on protein G

Buffer Solution Phosphate buffered saline

Preservative Stabilisers None present

Approx. Protein Concentrations IgG concentration 0.5 mg/ml

Immunogen	Recombinant chicken IL-1β
External Database Links	UniProt: O73909 Related reagents
RRID	AB_567064
Specificity	<p>Rabbit anti Chicken interleukin-1 beta antibody recognizes chicken Interleukin 1 beta (chIL-1beta), which shares homology with mammalian IL-1beta.</p> <p>IL-1 is a major regulator in both innate and adaptive immune responses, plays an important role in the regulation of acute inflammation and has also been implicated in many other processes, including both fever and fibrinogen induction. The previous names by which IL-1 has been known includes lymphocyte activating factor, endogenous pyrogen, catabolin, hemopoietin-1, melanoma growth inhibition factor, and osteoclast activating factor, reflecting its widespread cell expression.</p> <p>Chicken models indicate physiological similarities between chIL-1beta and mammalian IL-1beta in relation to its neural distribution and several factors have been shown to induce chIL-1beta secretion, including protein kinase C (PKC), Calmodulin-dependent protein kinase, lipopolysaccharide, phorbol esters, calcium and silica.</p> <p>Rabbit anti Chicken interleukin-1 beta antibody (AHP941Z) neutralizes chicken IL-1 beta (Gyorfy et al. 2003).</p>
Western Blotting	AHP941Z detects a band of approximately 29kDa in HD-11 cell lysates transfected with chIL-1.

Storage	<p>Store at -20°C only.</p> <p>Storage in frost-free freezers is not recommended.</p> <p>This product should be stored undiluted. Avoid repeated freezing and thawing as this may denature the antibody. Should this product contain a precipitate we recommend microcentrifugation before use.</p>
Guarantee	12 months from date of despatch
