

# Datasheet: ANNEX200APC BATCH NUMBER 166915

Description:	ANNEXIN V:APC ASSAY KIT
Name:	ANNEXIN V KIT
Format:	APC
Product Type:	Kits
Quantity:	200 TESTS

### **Product Details**

Applications	This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.   Yes No Not Determined Suggested Dilution   Flow Cytometry • Neat   Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.							
Max Ex/Em	Fluorophore	Excitation Max (nm	) Emission Max (nm)					
	APC	650	661					
Preservative Stabilisers	0.09% Sodium Azide (NaN <sub>3</sub> ) 1% Bovine Serum Albumin							
External Database Links	UniProt: <u>P08758</u> <u>Related reagents</u> Entrez Gene: <u>308</u> ANXA5 <u>Related reagents</u>							
Synonyms	ANX5, ENX2, PP4							
Product Information	phosphatidylserine (P the early stages of ap	S) in the presence c optosis. Detection o	f PS is a very sensitive	at the cell surface during				

The conjugation protocol used to prepare this product has not changed the native phospholipid binding properties of Annexin V. This protocol is designed to measure apoptosis easily and quickly in a sample of suspended cells.

Annexin V:APC 200 tests					
Propidium Iodide Staining Solution 2X 100 tests					
10X Binding Buffer 100 ml					
1) Dilute the10X binding buffer to 1X in distilled water (1 ml binding buffer + 9 ml distilled water).					
2) Wash cells once in PBS by gentle shaking or pipetting up and down. Then wash once in 1X binding buffer.					
3) Resuspend cells in 1X binding buffer, adjusting to a cell density of 1-5 x 10 <sup>6</sup> cells/ml.					
4) Add 5 $\mu$ I of APC conjugated Annexin V to 100 $\mu$ I of the cell suspension.					
5) Mix and incubate for 10 to15 minutes at room temperature.					
6) Wash cells in 1X binding buffer.					
7) Resuspend cells in 200 μl of 1X binding buffer.					
8) Add 5 µl of Propidium Iodide Staining Solution.					
9) Analyse by flow cytometry within 4 hours. Store at 2-8°C in the dark.					
Store at +4°C. DO NOT FREEZE.					
This product should be stored undiluted. Should this product contain a precipitate we recommend microcentrifugation before use.					
Guaranteed until date of expiry. Please see product label.
