

Datasheet: ANNEX50PE

BATCH NUMBER 166451

| Name: ANNEXIN V KIT Format: RPE Product Type: Kits Quantity: 50 TESTS | Description: | ANNEXIN V:PE ASSAY KIT |
|--|---------------|------------------------|
| Product Type: Kits | Name: | ANNEXIN V KIT |
| | Format: | RPE |
| Quantity: 50 TESTS | Product Type: | Kits |
| | Quantity: | 50 TESTS |

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

| | Yes | No | Not Determined | Suggested Dilution |
|----------------|-----|----|----------------|--------------------|
| Flow Cytometry | • | | | Neat |

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.

Product Information

This test employs the property of Annexin V to bind to the membrane phospholipid phosphatidylserine (PS) in the presence of Ca²⁺. PS is exposed at the cell surface during the early stages of apoptosis. Detection of PS is a very sensitive method for detecting cells entering apoptosis, at a time point considerably ahead of nuclear changes such as DNA degradation.

The conjugation protocol used to prepare this product has not changed the native phospholipid binding properties of Annexin V. This protocol is designed to measure apoptosis easily and quickly in a sample of suspended cells.

|----------------------------------|--|--|--|
| Reagents In The Kit | Annexin V:PE 7-AAD Viability Staining Solutio 10X Binding Buffer | 50 tests n 100 tests 30 ml | |
| Instructions For Use | 1) Dilute the10X Binding Buffer water). | to 1X in distilled water (1 ml Binding Buffer + 9 ml distilled | |
| | 2) Wash cells once in PBS by g in 1X binding buffer. | entle shaking or pipetting up and down. Then wash once | |
| | 3) Resuspend cells in 1X Binding Buffer, adjusting to a cell density of 1-5 x 10 ⁶ cells/ml. | | |
| | 4) Add 5 μl of PE conjugated Annexin V to 100 μl of the cell suspension. | | |
| | 5) Mix and incubate for 10 to15 minutes at room temperature. | | |
| | 6) Wash cells in 1X Binding Buffer. | | |
| | 7) Resuspend cells in 200 μl of | 1X Binding Buffer. | |
| | 8) Add 5 μl of 7-AAD Viability St temperature. | aining Solution and incubate for 5 minutes at room | |
| | 9) Analyse by flow cytometry wi | thin 4 hours. Store at 2-8°C in the dark. | |
| Storage | Store at +4°C. DO NOT FREEZ This product should be stored u recommend microcentrifugation | ndiluted. Should this product contain a precipitate we | |
| Guarantee | Guaranteed until date of expiry. | Please see product label. | |
