

Datasheet: BLP086

**BATCH NUMBER 166671**

<b>Description:</b>	SpyTag3 PEPTIDE
<b>Name:</b>	SPYTAG3 PEPTIDE
<b>Format:</b>	Purified
<b>Product Type:</b>	Blocking Peptide
<b>Quantity:</b>	1 mg

## Product Details

### Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit [www.bio-rad-antibodies.com/protocols](http://www.bio-rad-antibodies.com/protocols).

	Yes	No	Not Determined	Suggested Dilution
Immunoassay	▪			

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.

<b>Target Species</b>	Protein/peptide tag
<b>Product Form</b>	Purified peptide - liquid
<b>Source</b>	Chemical synthesis
<b>Buffer Solution</b>	Phosphate buffered saline
<b>Preservative Stabilisers</b>	None present
<b>Approx. Protein Concentrations</b>	1 mM (1.93 mg/ml)

**Product Information** **The SpyTag3 peptide** is provided as a blocking peptide for use with antibodies ligated to SpyCatcher, BiCatcher and FcCatcher products. SpyTag3 peptide binds to excess SpyCatcher sites that have not reacted with an antibody during ligation. The blocking peptide will bind to SpyCatcher versions 1, 2 and 3.

A recombinant antibody or any other protein with a SpyTag can be ligated to one of our

many prefabricated SpyCatcher protein modules. The reaction between SpyTag and SpyCatcher requires only mixing and a short incubation. If the ligation reaction mixture contains an excess of the SpyCatcher partner, unreacted SpyCatcher sites remaining in the reaction mixture could interfere with other assay components and generate background signal. This can be prevented by the addition of SpyTag3 peptide to the final coupled antibody or protein preparation to block unreacted SpyCatcher sites.

It is recommended to use a 2.5-fold molar excess of SpyTag3 peptide over SpyCatcher sites, i.e. 2.5-fold excess for SpyCatcher-coupled antibodies and 5-fold excess for BiCatcher- and FcCatcher-coupled antibodies and incubate for at least 5 minutes.

Visit [bio-rad-antibodies.com/SpyCatcher](http://bio-rad-antibodies.com/SpyCatcher) for further information.

---

<b>Purity</b>	>90% by RP-HPLC
---------------	-----------------

---

<b>Storage</b>	Store at -20°C only. Storage in frost-free freezers is not recommended. This product should be stored undiluted. Avoid repeated freezing and thawing as this may denature the protein. Should this product contain a precipitate we recommend microcentrifugation before use.
