

# Datasheet: BUF025B BATCH NUMBER 162392

| Description:  | 10x ANTIGEN RETRIEVAL BUFFER, pH8.0         |
|---------------|---|
| Name:         | ANTIGEN RETRIEVAL BUFFER, pH8.0 (UNIVERSAL) |
| Format:       | 10 X Concentrate                            |
| Product Type: | Accessory Reagent                           |
| Quantity:     | 500 ml                                      |

## **Product Details**

| Applications         | This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit <u>www.bio-rad-antibodies.com/protocols</u> . |           |       |               |                   |  |  |
|----------------------|--|-----------|-------|---------------|-------------------|--|--|
|                      | Immunohistology - Paraffin   | •         | No    | Not Botominou | Cuggootou Bhation |  |  |
|                      | Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.   |           |       |               |                   |  |  |
| Preparation          | Mix 10ml with 90ml distilled   | d water   |       |               |                   |  |  |
| Buffer Solution      | 10x  |           |       |               |                   |  |  |
| Intended Use         | Bio-Rad's Antigen unmasking fluid is a heat induced, epitope retrieval system. The 'universal' formulation presented at pH8.0 is suitable for use with most antibodies and gives excellent preservation of tissue morphology.  |           |       |               |                   |  |  |
| Instructions For Use | 1. Deparaffinize sections ar   | nd re-hyc | Irate |               |                   |  |  |
|                      | 2. Pre-heat retrieval buffer to 92°C *.  |           |       |               |                   |  |  |
|                      | 3. Place slides in buffer and incubate 10 minutes at 92°C *.   |           |       |               |                   |  |  |
|                      | 4. Allow to cool for 5-10 minutes.   |           |       |               |                   |  |  |
|                      | 5. Rinse in distilled water or PBS, proceed with staining.   |           |       |               |                   |  |  |
|                      | * N.B. Optimal unmasking is a function of time and temperature. Temperature (range   |           |       |               |                   |  |  |

|                                  | 90°C-100°C) and time (5-30 minutes) should be determined by each investigator.   |
