

# Datasheet: BUF032C BATCH NUMBER 168630

Description:	ELISA BSA BLOCK	
Name:	ELISA BSA BLOCK	
Format:	Ready To Use	
Product Type:	Accessory Reagent	
Quantity:	1000 ml	

## **Product Details**

## **Applications**

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit <a href="www.bio-rad-antibodies.com/protocols">www.bio-rad-antibodies.com/protocols</a>.

	Yes	No	Not Determined	Suggested Dilution
ELISA				Neat

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.

Product Form	Ready to use - liquid
Buffer Solution	Phosphate buffered saline
Preservative Stabilisers	0.05% Sodium Azide
Intended Hee	PUECOCO :

### **Intended Use**

BUF032C is a general purpose ELISA blocking buffer for use in all ELISA formats requiring low to average blocking strength. The buffer contains a mammalian protein blocking agent based on BSA, proprietary protein stabilizers and an antimicrobial agent. It provides a long-term stable environment for coating antigen or capture antibody, whilst minimizing non-specific binding interactions in the assay process. Plates can be blocked at room temperature and stored once dried for up to a year at +4°C.

#### **Instructions For Use**

- 1. Coat ELISA plate with antibody or antigen as required.
- 2. After incubation, remove the coating solution and wash the plate x2 with wash buffer. <u>BUF031A</u> can be used for this purpose.
- 3. Add 300-400ul of BUF032C and incubate for 2-24 hours. Use a volume equal to or

greater than the volume of coating solution.

4. After removal of the blocking buffer continue with the assay or dry the plate for long-term storage at +4°C.

Storage

Store at +4°C.

DO NOT FREEZE

This product should be stored undiluted.

Guarantee

Guaranteed until date of expiry. Please see product label.
