

Datasheet: BUF033B BATCH NUMBER 169388

Description:	ELISA ULTRABLOCK
Name:	ELISA ULTRABLOCK
Format:	Ready To Use
Product Type:	Accessory Reagent
Quantity:	500 ml

Product Details

Applications	This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit <u>www.bio-rad-antibodies.com/protocols</u> .

Product Form	Ready to use - liquid				
Buffer Solution	Phosphate buffered salin	e			
Preservative Stabilisers	0.05% Sodium Azide				
Intended Use	BUF033B is a high perfor high background problem stabilizers and an antimic sandwich ELISA assays serum, where the non-ma endogenous antibodies in	ns. The for crobial age with mam ammalian	rmulation i ent. It is pa malian sar blocking p	ncludes a proprietary articularly useful in ant nples, especially hum proteins are less likely	fish extract, molecular tigen-down and an, bovine and porcine
	Superior blocking is poss non-specific binding sites polystyrene plates often s long-term stable environr blocked at room tempera	s on the ac sterically in ment for co	dsorbed pr naccessibl oating anti	otein and unoccupied le to traditional blocke gen or capture antibo	l regions of the ers. It provides a dy. Plates can be

2. After incubation, remove the coating solution and wash the plate x2 with wash buffer.
BUF031A can be used for this purpose.

3. Add 300-400ul of BUF033B and incubate for 2-24 hours. Use a volume equal to or greater than the volume of coating solution.

4. After removal of the blocking buffer continue with the assay or dry the plate for long-term storage at +4°C.

Storage	Store at +4°C.

DO NOT FREEZE

This product should be stored undiluted.

Guarantee	Guaranteed until date of expiry. Please see product label.
