Datasheet: BUF070B BATCH NUMBER 160639

Description:	HUMAN SEROBLOCK	
Name:	HUMAN SEROBLOCK	
Format:	at: Reagent	
Product Type:	Accessory Reagent	
Quantity:	200 TEST	

Product Details

Applications	This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio- rad-antibodies.com/protocols.YesNoNot DeterminedSuggested DilutionFlow Cytometry•*See Instructions For Use			
	Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.			
Target Species	Human			
Buffer Solution	Phosphate buffered saline			
Preservative Stabilisers	0.09% Sodium Azide (NaN ₃)			
Product Information	Human Fc receptors are expressed on a variety of immune cell types including monocytes, macrophages, B cells, granulocytes and dendritic cells. Cells that express Fc receptors can give false positive immunofluorescent staining due to the Fc receptors binding of Ig. Human SeroBlock is designed to prevent such non-specific staining without interfering with appropriate target staining. Human SeroBlock is compatible with use of anti-human antibodies targeting Fc receptors in flow cytometry.			
Instructions For Use	In order to reduce Fc-receptor mediated binding of test antibodies the following procedure is recommended:-			
	1) Add 5 ul of Human SeroBlock per 100ul cell suspension for 5-10 minutes at room temperature.			

		antibodies from any n	s. Human SeroBlock is suitable for us nanufacturer or with in-house antibod cytometric analysis of human Fc rece	ies.*Human SeroBlock is als	
		3) Proceed with staini	ng as usual.

Storage		Store at +4°C. DO NOT FREEZE. This product should be stored undiluted. Should this product contain a precipitate we recommend microcentrifugation before use.			
Guarante	e	Guaranteed until date	of expiry. Please see product label.		
Health And Safety Information		Material Safety Datasheet documentation #10586 available at: https://www.bio-rad-antibodies.com/SDS/BUF070B 10586			
		This product contains	IgG extracted from human serum. TI	he human serum was tested	
		an FDA approved method and found to be negative for Human Immunodeficiency Virus RNA, Human Immunodeficiency Virus, Human T-Lymphotropic Virus, Hepatitis C RNA,			
		As no test can completely guarantee this material to be free of pathogens it should be			
		handled as potentially infectious.
