

Datasheet: C11SA

BATCH NUMBER 171421

| | |
|----------------------|------------------------|
| Description: | MOUSE SERUM WITH AZIDE |
| Name: | MOUSE SERUM |
| Format: | Serum |
| Product Type: | Serum |
| Quantity: | 5 ml |

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

| | Yes | No | Not Determined | Suggested Dilution |
|----------------------------|-----|----|----------------|--------------------|
| Immunohistology - Frozen | ▪ | | | |
| Immunohistology - Paraffin | ▪ | | | |
| Immunoassay | ▪ | | | |

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.

| | |
|---------------------------------|---|
| Product Form | Whole serum - liquid |
| Preparation | Normal mouse serum, 0.45um filtered. Prepared from barrier mice which are screened for infectious agents. |
| Preservative Stabilisers | 0.1% Sodium Azide |
| References | <ol style="list-style-type: none"> 1. Rückerl, D. <i>et al.</i> (2017) Macrophage origin limits functional plasticity in helminth-bacterial co-infection.
