

# Datasheet: C12CA

#### **BATCH NUMBER 160326**

Description:	BABY RABBIT COMPLEMENT
Name:	BABY RABBIT COMPLEMENT
Format:	Serum
Product Type:	Serum
Quantity:	2 ml

## **Product Details**

## **Applications**

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit <a href="www.bio-rad-antibodies.com/protocols">www.bio-rad-antibodies.com/protocols</a>.

	Yes	No	Not Determined	Suggested Dilution
Functional Assays (1)	•			
Immunoassay				

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.

(1) This product is not sold as sterile but can be sterilized by filtration if necessary. It is preferable to dilute the complement to a final working concentration before filtration in order to minimize loss of volume.

2. Anderson, L.D. Jr et al. (1999) Enhancement of graft-versus-tumor activity and graft-

Product Form	Baby rabbit serum - lyophilized	
Reconstitution	Reconstitute with 2ml ice cold distilled water	
Preservative Stabilisers	None present	
Product Information	<b>Baby rabbit complement</b> serum preparation is intended for u complement for cytotoxicity assays.	se as a source of rabbit
Instructions For Use	Use within one hour of reconstitution, keeping on ice throughout	ut.

PROLYMPHOCYTIC leukemia Biomarker Research.8, 54. 21. Mosti, L. et al. (2021) Targeted multi-epitope switching enables straightforward positive/negative selection of CAR T cells. Gene Ther. 28 (9): 602-12. Storage Prior to reconstitution store at +4°C. Following reconstitution store at +4°C for 1 hour or aliquot and store at -70°C for longer. This product should be stored undiluted. Avoid repeated freezing and thawing as this may denature the product. Should this product contain a precipitate we recommend microcentrifugation before use. Guarantee Guaranteed until date of expiry. Please see product label. **Health And Safety** Material Safety Datasheet documentation #10288 available at: Information https://www.bio-rad-antibodies.com/SDS/C12CA 10288 Regulatory For research purposes only
