Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.

(1) This product is not sold as sterile but can be sterilized by filtration if necessary. It is preferable to dilute the complement to a final working concentration before filtration in order to minimize loss of volume.

Product Form

Baby rabbit serum - lyophilised

Reconstitution

Reconstitute with 2ml ice cold distilled water

Preservative Stabilisers

None present

Product Information

Baby rabbit complement serum preparation is intended for use as a source of rabbit complement for cytotoxicity studies.

Instructions For Use

Use within one hour of reconstitution, keeping on ice throughout.
