**Specificity**

**Human anti plasmodium falciparum HRPII antibody, clone AbD14964** recognizes HRPII (histidine rich protein II) from the Malaria causing protozoan species *Plasmodium falciparum* .

Clone AbD14964 was selected by phage display under heat stress conditions. The T<sub>m</sub> value for thermal denaturation of the antibody was measured by CD spectroscopy and has been found to be 70 °C. When conjugated this clone can be used as a detection antibody with HCA160 as the capture antibody in sandwich assay.

---

**ELISA**

This product is suitable for use in direct ELISA applications. This product may be used as a detection reagent in a sandwich ELISA together with [HCA160](#) as the capture reagent.

---
