

Datasheet: HCA173

Description:	HUMAN ANTI CHICKEN CD25
Specificity:	CD25
Other names:	IL-2 RECEPTOR ALPHA
Format:	Purified
Product Type:	Monoclonal Antibody
Clone:	AbD13504
Isotype:	HuCAL Fab bivalent
Quantity:	0.1 mg

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
Flow Cytometry	■			Neat - 1/100
Immunohistology - Frozen			■	
Immunohistology - Paraffin			■	
ELISA			■	
Immunoprecipitation			■	
Western Blotting			■	

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.

Target Species	Chicken
Species Cross Reactivity	Does not react with: Duck, Goose
Product Form	A bivalent human recombinant Fab (lambda light chain) selected from the HuCAL® phage display library, expressed in <i>E. coli</i> . This Fab fragment is dimerized via a helix-turn-helix motif. The antibody is tagged with a myc-tag (EQKLISEEDL) and a his-tag (HHHHHH) at the C-terminus of the antibody heavy chain. This antibody is supplied as a liquid.
Preparation	Metal chelate affinity chromatography
Buffer Solution	Phosphate buffered saline
Preservative Stabilisers	0.09% Sodium Azide (NaN ₃)
Approx. Protein	Antibody concentration 0.5 mg/ml

Concentrations

Immunogen Recombinantly expressed his-tagged chicken CD25

Specificity **Human anti Chicken CD25 antibody, clone AbD13504** recognizes the chicken IL-2 receptor alpha chain (IL-2R α), identified as the chicken homologue of human CD25 and cited as ChCD25 in published literature.
Chicken IL-2R α is a cell surface antigen expressed by activated T-lymphocytes, monocytes/macrophages and thrombocytes.
CD4+ve/CD25+ve and CD8+ve/CD25+ve cells are up-regulated following infection with avian influenza virus (H9N2) and may therefore have an important role in the immune response to avian influenza virus infection ([Huang et al. 2012](#)).
Chicken IL-2R α is the low affinity receptor for Interleukin-2.

Storage Store at +4°C or at -20°C if preferred.
Storage in frost-free freezers is not recommended.
This product should be stored undiluted. Avoid repeated freezing and thawing as this may denature the antibody. Should this product contain a precipitate we recommend microcentrifugation before use.

Guarantee 12 months from date of despatch
