

Datasheet: HCA216P

BATCH NUMBER 173358

Description:	HUMAN ANTI INFLIXIMAB:HRP
Specificity:	INFLIXIMAB
Other names:	REMICADE®
Format:	HRP
Product Type:	Monoclonal Antibody
Clone:	AbD19376_hlgG1
Isotype:	IgG1
Quantity:	0.1 mg

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
ELISA	▪			

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.

Product Form	Human IgG1 antibody selected from the HuCAL phage display library and expressed in a human cell line. Conjugated to horseradish peroxidase (HRP) - liquid.
Preparation	Purified IgG prepared by affinity chromatography on Protein A.
Source	HKB-11
Buffer Solution	Phosphate buffered saline.
Preservative Stabilisers	0.0095% MIT
Approx. Protein Concentrations	Total protein concentration 1.0 mg/ml.
Immunogen	Infliximab

Specificity **Human anti Infliximab, clone AbD19376_hlgG1**, is an anti-idiotypic antibody that binds to both free infliximab and to infliximab bound to its target, TNF α . Clone AbD19376_hlgG1 does not inhibit the binding of infliximab to TNF α . It can be used in bioanalytical assays to measure the levels of infliximab and biosimilar products, such as Inflectra and Renflexis, in patient samples.

Clone AbD19376_hlgG1 binds to an epitope outside the infliximab binding site. This epitope is shared with other chimeric antibodies that are highly homologous to infliximab including the chimeric antibody cetuximab but not rituximab.

Human anti Infliximab, clone AbD19376_hlgG1 is a fully human antibody and may be used to develop and calibrate immune response assays to measure the anti-drug antibody (ADA) response in patient sera. In the HRP-conjugated format, clone AbD19376_IgG1 is suitable as a detection antibody in pharmacokinetic (PK) assays to measure total infliximab levels (free drug, partially bound and fully bound).

Infliximab (branded as Remicade®) is a chimeric monoclonal antibody drug (IgG1/kappa) that has been approved for treatment of psoriasis, Crohn's disease, ankylosing spondylitis, psoriatic arthritis, rheumatoid arthritis, and ulcerative colitis.

Infliximab is directed against Tumor Necrosis Factor Alpha (TNF α) and acts by blocking the binding of this cytokine to its receptors. Infliximab also induces apoptosis of TNF α expressing T-lymphocytes.

[View a summary of all anti-infliximab antibodies.](#)

Affinity The monovalent intrinsic affinity of this antibody in an unconjugated format was measured as $K_D=0.7$ nM by real time, label-free molecular interaction analysis on immobilized infliximab.

ELISA This product may be used as a detection reagent in a bridging ELISA for PK assay development together with [HCA214](#) or [HCA212](#) as the capture reagent. Protocol: [PK bridging ELISA to measure total drug.](#)

Storage This product is shipped frozen.
When ready to use, thaw and aliquot the sample as needed. Store aliquots at -70°C, if available, otherwise store at -20°C. It is not recommended to keep aliquots at 4°C for more than one week.

Guarantee 12 months from date of despatch.

Acknowledgements This product and/or its use is covered by claims of U.S. patents, and/or pending U.S. and non-U.S. patent applications owned by or under license to Bio-Rad Laboratories, Inc. See bio-rad.com/en-us/trademarks for details.

Health And Safety Information

Material Safety Datasheet documentation #20479 available at:
<https://www.bio-rad-antibodies.com/SDS/HCA216P>

Licensed Use

For *in vitro* research purposes and for commercial applications for the provision of *in vitro* testing services to support preclinical and clinical drug development. Any re-sale in any form or any other commercial application needs a written agreement with Bio-Rad.
