

Datasheet: HCA228P

BATCH NUMBER 166958

| | |
|----------------------|--------------------------|
| Description: | HUMAN ANTI CETUXIMAB:HRP |
| Specificity: | CETUXIMAB |
| Format: | HRP |
| Product Type: | Monoclonal Antibody |
| Clone: | AbD19376_hlgG1 |
| Isotype: | IgG1 |
| Quantity: | 0.1 mg |

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

| | Yes | No | Not Determined | Suggested Dilution |
|-------|-----|----|----------------|--------------------|
| ELISA | ■ | | | |

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.

| | |
|---------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Product Form | Human IgG1 antibody selected from the HuCAL phage display library and expressed in a human cell line and conjugated to horseradish peroxidase (HRP) - liquid. |
| Preparation | Purified IgG prepared by affinity chromatography on Protein A |
| Source | HKB-11 |
| Buffer Solution | Phosphate buffered saline |
| Preservative Stabilisers | 0.0095% MIT |
| Approx. Protein Concentrations | IgG concentration 1.0 mg/ml |
| Immunogen | Chimeric monoclonal antibody |
| Specificity | Human Anti-Cetuximab Antibody, clone AbD19376_hlgG1 , is a non-inhibitory |

anti-idiotypic antibody that binds to cetuximab. This antibody recognizes an epitope outside the cetuximab binding site and so does not inhibit the binding of the drug to its target, epidermal growth factor receptor (EGFR). This epitope is shared with other chimeric antibodies that are highly homologous to cetuximab including infliximab but excluding rituximab. The antibody is suitable for the development of bioanalytical assays for cetuximab and biosimilars.

Clone AbD19376_hIgG1 is a fully human recombinant monoclonal with IgG1 isotype and is suitable as a surrogate positive control or calibrator in an anti-drug antibody (ADA) assay. In addition, it is suitable as a detection antibody in pharmacokinetic (PK) bridging ELISA, with Anti-Cetuximab Antibody [HCA220](#) as the capture antibody. This combination enables measurement of free and partially bound cetuximab, which is equivalent to total drug when trough serum levels are above 4 µg/ml.

Cetuximab (brand name Erbitux) is a chimeric monoclonal antibody drug (IgG1/kappa) approved for treatment of KRAS wild-type metastatic colorectal cancers and squamous cell carcinoma of the head and neck. This therapeutic antibody is directed against EGFR and inhibits tumor cell proliferation by blocking the interaction of epidermal growth factor (EGF) with its receptor.

| | |
|-------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Affinity | The monovalent intrinsic affinity of this antibody is $K_D=39$ nM as measured by real time, label-free molecular interaction analysis on immobilized Cetuximab. |
| ELISA | This product may be used in a direct ELISA or as a detection antibody in a cetuximab bridging ELISA for PK assay development together with HCA220 as the capture reagent. Protocol: PK bridging ELISA to measure total drug . |
