

## Datasheet: HCA265

**BATCH NUMBER 1702**

<b>Description:</b>	HUMAN ANTI PANITUMUMAB
<b>Specificity:</b>	PANITUMUMAB
<b>Other names:</b>	VECTIBIX®
<b>Format:</b>	Purified
<b>Product Type:</b>	Monoclonal Antibody
<b>Clone:</b>	AbD23897_hlgG1
<b>Isotype:</b>	IgG1
<b>Quantity:</b>	0.1 mg

## Product Details

### Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit [www.bio-rad-antibodies.com/protocols](http://www.bio-rad-antibodies.com/protocols).

	Yes	No	Not Determined	Suggested Dilution
ELISA	▪			

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.

### Product Form

Human IgG1 antibody (lambda light chain) selected from the HuCAL® phage display library and expressed in a human cell line.

### Preparation

Purified IgG prepared by affinity chromatography on Protein A

### Buffer Solution

Phosphate buffered saline

### Preservative Stabilisers

0.01% Thiomersal

### Approx. Protein Concentrations

IgG concentration 0.5 mg/ml

### Immunogen

Panitumumab

### Specificity

**Human anti panitumumab, clone AbD23897\_hlgG1**, is a paratope specific, high affinity,

anti-idiotypic antibody that specifically recognizes the fully human monoclonal antibody drug panitumumab and inhibits it binding to its target, epidermal growth factor receptor (EGFR). The antibody can be used to measure the levels of panitumumab and biosimilar products in bioanalytical assays.

Clone AbD23897\_hIgG1 is a fully human recombinant monoclonal antibody with IgG1 isotype and is suitable as a reference standard in an anti-drug antibody (ADA) assay. Additionally the antibody can be used to develop a pharmacokinetic (PK) bridging assay to measure free drug. This antibody, in full immunoglobulin format, is recommended as the detection antibody, paired with the antibody clone AbD23894 ([HCA264](#)) in monovalent Fab format, as the capture antibody.

Panitumumab (Vectibix®) is a fully human monoclonal antibody (IgG2/kappa) specific to the transmembrane protein EGFR. The drug binds to the extracellular domain of the EGFR, inhibiting the activation of the intracellular signaling cascade. It is approved by the FDA and EMA for the treatment of EGFR-expressing metastatic colorectal cancer.

---

<b>Affinity</b>	The monovalent intrinsic affinity of this antibody was measured as $K_D = 0.3$ nM by real time, label free molecular interaction analysis on immobilized panitumumab.
<b>ELISA</b>	This product may be used in direct or indirect ELISA and in an ELISA bridging assay as a detection antibody together, when conjugated to HRP, with <a href="#">HCA264</a> as the capture reagent. It is also suitable as a fully human control or calibrator antibody in an ADA bridging ELISA. Protocol: <a href="#">PK bridging ELISA to measure free drug</a> Protocol: <a href="#">ADA bridging ELISA</a>

<b>Storage</b>	Store at +4°C or at -20°C if preferred. Storage in frost-free freezers is not recommended. This product should be stored undiluted. Avoid repeated freezing and thawing as this may denature the antibody. Should this product contain a precipitate we recommend microcentrifugation before use.
<b>Guarantee</b>	12 months from date of despatch
<b>Acknowledgements</b>	Sold under license of U.S. Patents 6753136, 7785859 and 8273688 and corresponding patents. This antibody was developed by Bio-Rad, Zeppelinstr. 4, 82178 Puchheim, Germany.
