

Datasheet: HCA274

Description:	HUMAN ANTI GOLIMUMAB (DRUG/TARGET COMPLEX)
Specificity:	GOLIMUMAB DRUG/TARGET COMPLEX
Other names:	SIMPONI®
Format:	Purified
Product Type:	Monoclonal Antibody
Clone:	AbD25705
Isotype:	HuCAL Fab monovalent
Quantity:	0.1 mg

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
ELISA	▪			

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.

Product Form

A monovalent human recombinant Fab (lambda light chain) selected from the HuCAL phage display library, expressed in *E. coli*. The antibody is tagged with a DYKDDDDK tag and a HIS-tag (HHHHHH) at the C-terminus of the antibody heavy chain. This antibody is supplied as a liquid.

Preparation

Metal chelate affinity chromatography

Source

E. coli

Buffer Solution

Phosphate buffered saline

Preservative Stabilisers

0.09% Sodium Azide (NaN₃)

Approx. Protein Concentrations

Antibody concentration 0.5 mg/ml

Immunogen	Golimumab/TNF α complex
Specificity	<p>Human anti golimumab (drug/target complex), clone AbD25705 is an affinity matured recombinant antibody in monovalent Fab format that specifically recognizes golimumab when in complex with its target, tumor necrosis factor alpha (TNFα). Clone AbD25705 does not recognize unbound golimumab nor free TNFα. The antibody can be used in a pharmacokinetic (PK) antigen capture format assay to measure golimumab that has been captured via immobilized human TNFα. It is ideal for bioanalytical assays to measure the level of drug or biosimilar in complex with the TNFα target.</p> <p>Golimumab, marketed under the brand name Simponi®, is a recombinant human IgG1/kappa monoclonal antibody approved for the treatment of rheumatoid arthritis, psoriatic arthritis and ankylosing spondylitis. This therapeutic antibody, directed against TNFα, acts by blocking the binding of TNFα to its receptors, resulting in a down-regulation of the inflammatory response associated with autoimmune diseases.</p> <p>View a summary of all anti-golimumab antibodies</p>
Affinity	The intrinsic affinity of the monovalent form of Human anti Golimumab (Drug/target complex) antibody, clone AbD25705 is $K_D = 6$ nM as measured by real time, label free molecular interaction analysis on immobilized golimumab in complex with human TNF α .
ELISA	<p>This product may be used in an indirect ELISA to detect the golimumab/TNFα complex or to detect golimumab bound to immobilized TNFα.</p> <p>Protocol: PK antigen capture ELISA to measure bound drug exclusively.</p>

Storage	<p>This product is shipped at ambient temperature. It is recommended to aliquot and store at -20°C on receipt. When thawed, aliquot the sample as needed. Keep aliquots at 2-8°C for short term use (up to 4 weeks) and store the remaining aliquots at -20°C.</p> <p>Avoid repeated freezing and thawing as this may denature the antibody. Storage in frost-free freezers is not recommended.</p>
Guarantee	12 months from date of despatch
Acknowledgements	<p>This product and/or its use is covered by claims of U.S. patents, and/or pending U.S. and non-U.S. patent applications owned by or under license to Bio-Rad Laboratories, Inc.
