

Datasheet: HCA275F BATCH NUMBER 153990

Description:	HUMAN ANTI BACTERIAL ALKALINE PHOSPHATASE:FITC
Specificity:	ALKALINE PHOSPHATASE
Format:	FITC
Product Type:	Monoclonal Antibody
Clone:	AbD25296_hlgG2
Isotype:	lgG2
Quantity:	0.1 mg

Product Details

Applications	This product has been reported to work in the following applications. This inf derived from testing within our laboratories, peer-reviewed publications or pe communications from the originators. Please refer to references indicated for						
	information. For general protocol recommendations, please visit <u>www.bio-</u>						
	rad-antibodies.com/pro	otocols.					
		Yes N	10	Not Determined	Suggested Dilution		
	Flow Cytometry	•			1/5 - 1/50		
	Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.						
Target Species	Bacterial						
Product Form	Human IgG2 antibody library and expressed Isomer 1 (FITC) - liqui	(lambda light ch in a human cell d	iain) selec line. Conj	cted from the Hu ugated to Fluore	CAL® phage display scein Isothiocyanate		
Max Ex/Em	Fluorophore	Excitation Max	(nm) Em	nission Max (nm)			
	FITC	490		525			
Preparation	Purified IgG prepared by affinity chromatography on Protein A						
Buffer Solution	Phosphate buffered saline						
Preservative Stabilisers	0.09% Sodium Azide ((NaN ₃)					
Approx. Protein Concentrations	IgG concentration 0.1 mg/ml						

Immunogen	Bacterial alkaline phosphatase
External Database Links	UniProt: <u>P00634</u> <u>Related reagents</u>
Specificity	Human Anti-Bacterial Alkaline Phosphatase Antibody, clone AbD25296_hlgG2 recognizes bacterial alkaline phosphatase (BAP), a periplasmic enzyme which catalyzes the release of 5'- and 3'-phosphate groups from DNA, RNA and nucleotides. BAP can also dephosphorylate a number of proteins and alkaloids, and has an optimum pH of 8.0. BAP is encoded by the phoA gene, and forms a homodimer of two identical ~47 kDa subunits. Fab-A and Fab-Max format antibodies generated using HuCAL® technology are formed via dimerization of BAP. The Anti-BAP Antibody HCA275P can be used as a secondary detection reagent with HuCAL antibodies in Fab-A and Fab-Max formats (Fab-Max is a modified BAP fusion antibody with inactivated enzymatic activity). View further information about HuCAL antibody formats.
Affinity	The monovalent intrinsic affinity of this antibody was measured as K _D =38pM by real time, label-free molecular interaction analysis on immobilized HuCAL antibody in the Fab-A-FH format
References	1. Harth, S. <i>et al.</i> (2019) Generation by phage display and characterization of drug-target complex-specific antibodies for pharmacokinetic analysis of biotherapeutics. <u>MAbs. 11 (1):</u> <u>178-90.</u>
Storage	Store at +4°C or at -20°C if preferred. Storage in frost-free freezers is not recommended. This product should be stored undiluted. Avoid repeated freezing and thawing as this may denature the antibody. Should this product contain a precipitate we recommend microcentrifugation before use.
Guarantee	12 months from date of despatch
Acknowledgements	Sold under license of U.S. Patents 6753136, 7785859 and 8273688 and corresponding patents. This antibody was developed by Bio-Rad, Zeppelinstr. 4, 82178 Puchheim, Germany.
Health And Safety Information	Material Safety Datasheet documentation #10041 available at: https://www.bio-rad-antibodies.com/SDS/HCA275F 10041
Regulatory	For research purposes only
Technical Advice	Recommended protocols and further information about HuCAL recombinant antibody technology can be found in the <u>HuCAL Antibodies Technical Manual</u>
