

Datasheet: HCA289

BATCH NUMBER 1704

| | |
|----------------------|----------------------|
| Description: | HUMAN ANTI GOLIMUMAB |
| Specificity: | GOLIMUMAB |
| Other names: | SIMPONI |
| Format: | Purified |
| Product Type: | Monoclonal Antibody |
| Clone: | AbD25455 |
| Isotype: | HuCAL Fab monovalent |
| Quantity: | 0.1 mg |

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

| | Yes | No | Not Determined | Suggested Dilution |
|-------|-----|----|----------------|--------------------|
| ELISA | ▪ | | | |

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.

Product Form

A monovalent human recombinant Fab (lambda light chain) selected from the HuCAL® phage display library, expressed in *E. coli*. The antibody is tagged with a DYKDDDDK tag and a HIS-tag (HHHHHH) at the C-terminus of the antibody heavy chain. This antibody is supplied as a liquid.

Preparation

Metal chelate affinity chromatography

Buffer Solution

Phosphate buffered saline

Preservative Stabilisers

0.01% Thiomersal

Approx. Protein Concentrations

Antibody concentration 0.5 mg/ml

Immunogen

Golimumab

Specificity **Human Anti-Golimumab Antibody, clone AbD25455** is an anti-idiotypic antibody that specifically recognizes the monoclonal antibody drug golimumab. This antibody binds to both free golimumab and to golimumab bound to its target tumor necrosis factor alpha (TNF α). Clone AbD25455 does not inhibit the binding of golimumab to its target TNF α and can be used to measure total golimumab and biosimilar products in bioanalytical assays.

Clone AbD25455 is an affinity-matured variant of clone AbD20897 ([HCA242](#)), with about 7-fold affinity improvement.

A pair of anti golimumab antibodies can be used to develop a pharmacokinetic (PK) bridging assay to measure free drug. This antibody, in monovalent Fab format, is recommended as the capture antibody, paired with an antibody in full immunoglobulin format, clone AbD25451_hIgG1 ([HCA290](#)), as the detection antibody.

Golimumab, marketed under the brand name Simponi is a recombinant human IgG1/kappa monoclonal antibody approved for the treatment of rheumatoid arthritis, psoriatic arthritis and ankylosing spondylitis. This therapeutic antibody, directed against TNF α , acts by blocking the binding of TNF α to its receptors, resulting in a down-regulation of the inflammatory response associated with autoimmune diseases.

[View a summary of all anti-golimumab antibodies](#)

Affinity The monovalent intrinsic affinity of AbD25455 was measured as $K_D = 0.9$ nM by real time, label free molecular interaction analysis on immobilized golimumab

ELISA Clone AbD25455 can be used in a direct or indirect ELISA system or as capture antibody for golimumab in a bridging ELISA together with [HCA290](#) (AbD25455_hIgG1) as the detection reagent.

Protocol: [PK bridging ELISA to measure total drug](#)

Storage Store at +4°C or at -20°C if preferred.
Storage in frost-free freezers is not recommended.
This product should be stored undiluted. Avoid repeated freezing and thawing as this may denature the antibody. Should this product contain a precipitate we recommend microcentrifugation before use.

Guarantee 12 months from date of despatch

Acknowledgements Sold under license of U.S. Patents 6753136, 7785859 and 8273688 and corresponding patents. This antibody was developed by Bio-Rad, Zeppelinstr. 4, 82178 Puchheim, Germany. Simponi is a registered trademark of Janssen Biotech, Inc. in the USA and Merck & Co, Inc. in Europe.
His-tag is a registered trademark of EMD Biosciences.
