

## Datasheet: HCA313P

|                      |                           |
|----------------------|---------------------------|
| <b>Description:</b>  | HUMAN ANTI ECULIZUMAB:HRP |
| <b>Specificity:</b>  | ECULIZUMAB                |
| <b>Format:</b>       | HRP                       |
| <b>Product Type:</b> | Monoclonal Antibody       |
| <b>Clone:</b>        | AbD32107_hlgG1            |
| <b>Isotype:</b>      | IgG1                      |
| <b>Quantity:</b>     | 0.1 mg                    |

## Product Details

### Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit [www.bio-rad-antibodies.com/protocols](http://www.bio-rad-antibodies.com/protocols).

|       | Yes | No | Not Determined | Suggested Dilution |
|-------|-----|----|----------------|--------------------|
| ELISA | ■   |    |                |                    |

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.

|                                       |  |
|---------------------------------------|--|
| <b>Product Form</b>                   | Human IgG1 antibody (kappa light chain) selected from the HuCAL phage display library and expressed in a human cell line. Conjugated to horseradish peroxidase (HRP) - liquid. |
| <b>Preparation</b>                    | Purified IgG prepared by affinity chromatography on Protein A  |
| <b>Source</b>                         | HKB-11   |
| <b>Buffer Solution</b>                | Phosphate buffered saline  |
| <b>Preservative Stabilisers</b>       | 0.01% Thiomersal   |
| <b>Approx. Protein Concentrations</b> | Antibody concentration 1.0 mg/ml   |
| <b>Immunogen</b>                      | Eculizumab   |
| <b>Specificity</b>                    | <b>Human Anti-Eculizumab Antibody, clone AbD32107_hlgG1</b> is a paratope specific, inhibitory anti-idiotypic antibody that specifically recognizes the free humanized         |

monoclonal antibody eculizumab. It does not recognize free human complement C5 or eculizumab in complex with C5. The antibody can be used to measure free eculizumab or eculizumab biosimilars in patient samples.

Clone AbD32107\_hIgG1 is a fully human recombinant monoclonal antibody with IgG1 isotype and is suitable as a surrogate positive control or calibrator in an anti-drug antibody (ADA) assay. A pair of anti-eculizumab antibodies can be used to develop a pharmacokinetic (PK) bridging assay to measure free drug. This antibody is recommended as the detection reagent, paired with Anti-Eculizumab Antibody clone AbD32311 ([HCA312](#)) in monovalent Fab format as the capture antibody.

Eculizumab (Soliris) is a humanized IgG2/4 kappa antibody. The heavy chains are comprised of human IgG2 sequences in CH1, the hinge and the adjacent portion CH2, and human IgG4 sequences in the remaining part of CH2 and CH3. The drug is used to treat paroxysmal nocturnal hemoglobinuria (PNH), a rare acquired life-threatening disease of the blood characterized by destruction of red blood cells by the complement system. It also has approval as an orphan drug for treatment of atypical hemolytic uremic syndrome (aHUS). Eculizumab specifically binds to the terminal complement component 5 (C5) and inhibits the cleavage of C5 to C5a and C5b by the C5 convertase, which prevents the generation of the terminal complement complex C5b-9. Both C5a and C5b-9 cause the terminal complement-mediated events that are characteristic of PNH and aHUS. A 1:1 molar ratio of eculizumab to C5 is sufficient for C5 inhibition.

|                          |  |
|--------------------------|--|
| <b>Affinity</b>          | The intrinsic affinity of the monovalent form of Human anti Eculizumab antibody, clone AbD32107_hIgG1 is $K_D = 0.6$ nM as measured by real time, label free molecular interaction analysis on immobilized Eculizumab.   |
| <b>ELISA</b>             | <p>Human anti Eculizumab antibody, clone AbD32107_hIgG1 can be used in a direct ELISA or as the detection antibody for Eculizumab in a bridging ELISA together with <a href="#">HCA312</a> as the capture reagent.</p> <p>Protocol: <a href="#">PK bridging ELISA to measure free drug</a>.</p>                    |
| <b>Storage</b>           | <p>This product is shipped frozen.</p> <p>When ready to use, thaw and aliquot the sample as needed. Store aliquots at -70°C, if available, otherwise store at -20°C. It is not recommended to keep aliquots at 4°C for more than one week.</p>   |
| <b>Guarantee</b>         | 12 months from date of despatch  |
| <b>Acknowledgements</b>  | <p>This product and/or its use is covered by claims of U.S. patents, and/or pending U.S. and non-U.S. patent applications owned by or under license to Bio-Rad Laboratories, Inc. See <a href="#">bio-rad.com/en-us/trademarks</a> for details.</p> <p>Soliris is a trademark of Alexion Pharmaceuticals, Inc.</p> |
