

Datasheet: ICT9120

BATCH NUMBER 168861

Description:	FLICA™ 660 POLY CASPASE KIT
Name:	POLY CASPASE
Format:	660 (Red Fluorescence)
Product Type:	Kits
Quantity:	25 - 50 TESTS

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
Flow Cytometry	▪			
Immunofluorescence	▪			

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.

Max Ex/Em	Fluorophore	Excitation Max (nm)	Emission Max (nm)

Product Information

The FLICA 660 Poly Caspase kit uses a quick and easy method to analyze active caspases in apoptotic cells.

This FLICA reagent binds the following activated caspases: Caspase 1, Caspase 3, Caspase 4, Caspase 5, Caspase 6, Caspase 7, Caspase 8 and Caspase 9. It can also be used as a generic probe for the detection of most caspases.

Test Principle

Caspase FLICA kits measure apoptosis by detecting active caspases in whole, living cells. These kits do not work by using antibodies or as an ELISA. Instead, their methodology is based on a unique cell-permeable and non-cytotoxic reagent called the Fluorochrome Inhibitor of Caspases (FLICA). The FLICA reagent contains a caspase inhibitor sequence linked to a far-red fluorescent 660 dye.

The Caspase FLICA Kits are suitable for cells in suspension and adherent cells from many species including mammalian, insect and yeast. Different cell types, e.g. HeLa, primary neurons, macrophages and lymphocytes have also been successfully studied with

these kits. This kit can be used with either a flow cytometer or fluorescence microscope.

Reagents In The Kit	1 vial of 660-VAD-FMK FLICA Reagent - lyophilized 10x Apoptosis Wash Buffer, 15 mL Fixative, 6 mL
Instructions For Use	Instructions for use can be found at www.bio-rad-antibodies.com/uploads/IFU/ICT9120.pdf
Storage	Store the unopened kit and each unopened component at +4°C until the expiration date. Once reconstituted with DMSO, use FLICA reagent immediately, or store at -20°C for 6 months protected from light and thawed no more than twice during that time.
Guarantee	Guaranteed until date of expiry. Please see product label.
Acknowledgements	FLICA is a trademark of Immunochemistry Technologies, LLC.
Health And Safety Information	Material Safety Datasheet documentation #20373 #10471 #10498 available at: https://www.bio-rad-antibodies.com/SDS/ICT9120 660-VAD-FMK FLICA Reagent (20373) 10x Apoptosis Wash Buffer (10471) Fixative (10498)
Regulatory	For research purposes only
