

Datasheet: ICT9122

Description:	FLICA™ 660 CASPASE-1 KIT
Name:	CASPASE-1
Format:	660 (Red Fluorescence)
Product Type:	Kits
Quantity:	25 - 50 TESTS

Product Details

Applications

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit www.bio-rad-antibodies.com/protocols.

	Yes	No	Not Determined	Suggested Dilution
Flow Cytometry	▪			
Immunofluorescence	▪			

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.

Product Information

The FLICA 660 caspase-1 kit uses a target sequence (YVAD) sandwiched between a far-red fluorescent 660 dye and a fluoromethylketone (FMK) to make a quick and flexible method to analyze active caspase-1 in apoptotic cells.

Test Principle

Caspase FLICA kits measure apoptosis by detecting active caspases in whole, living cells. These kits do not work by using antibodies or as an ELISA. Instead, their methodology is based on a unique cell-permeable and non-cytotoxic reagent called the Fluorochrome Inhibitor of Caspases (FLICA). The FLICA reagent contains a caspase inhibitor sequence linked to a far-red fluorescent 660 dye.

The Caspase FLICA Kits are suitable for cells in suspension and adherent cells from many species including mammalian, insect and yeast. Different cell types, e.g. HeLa, primary neurons, macrophages and lymphocytes have also been successfully studied with these kits. This kit can be used with either a flow cytometer or fluorescence microscope.

Reagents In The Kit

1 vial of 660-YVAD-FMK FLICA Caspase-1 Reagent - lyophilized
 10x Cellular Wash Buffer, 15 mL
 Fixative, 6 mL

Instructions For Use

Instructions for use can be found at www.bio-rad-antibodies.com/uploads/IFU/ICT9122.pdf

Storage

Store the unopened kit (and each unopened component) at +4°C until the expiration date.

Protect the FLICA reagent from light at all times.

Once reconstituted in DMSO, the FLICA stock should be stored at -20°C protected from light.

Shelf Life Please see label for expiry date
