

Datasheet: ICT935

## **BATCH NUMBER 165647**

Description:	MAGIC RED™ CASPASE-3/7 KIT	
Name:	CASPASE-3/7	
Format:	MAGIC RED™ (Red Fluorescence)	
Product Type:	Kits	
Quantity:	25 TESTS	

### **Product Details**

## **Applications**

This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit <a href="www.bio-rad-antibodies.com/protocols">www.bio-rad-antibodies.com/protocols</a>.

	Yes	No	Not Determined	<b>Suggested Dilution</b>
Immunofluorescence				

Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.

## **Product Information**

The Magic Red Caspase-3/7 kit uses a quick and easy method to analyze intracellular active caspases in apoptotic cells.

#### **Test Principle**

Caspase Magic Red kits measure apoptosis by detecting active caspases in whole, living cells. These kits do not work by using antibodies or as an ELISA. Instead, their methodology is based on a cell-permeable and non-cytotoxic reagent which is cleaved in the presence of caspases to produce a fluorescent product. The Magic Red reagent contains a caspase inhibitor sequence (DEVD)<sub>2</sub> linked to a red (Cresyl Violet) fluorescent probe.

The Caspase Magic Red kits are suitable for cells in suspension and adherent cells from many species including mammalian, insect and yeast. Different cell types, e.g. Jurkat, HL-60, THP-1, fibroblasts, UMUC-3, MCF-7 and U937 cells have also been successfully studied with these kits.

This kit can be used in fluorescence microscopy or with fluorescence plate readers using black microtitre plates.

#### Reagents In The Kit

Magic Red Substrate MR-(DEVD)2, 25 Tests - lyophilized

Hoechst 33342, 1 mL Acridine Orange, 0.5 mL

Instructions For Use	Instructions for use can be found at www.bio-rad-antibodies.com/uploads/IFU/ICT935.pdf

Storage	Store the unopened kit and each unopened component at +4°C until the expiration date.  Once reconstituted with DMSO, use Magic Red reagent immediately, or store at -20°C for 6 months protected from light and thawed no more than twice during that time.
Guarantee	Guaranteed until date of expiry. Please see product label.
Acknowledgements	Magic Red is a trademark of Immunochemistry Technologies, LLC.
