

## Datasheet: ICT944 BATCH NUMBER 169377

Description:	MITOCHONDRIAL PERMEABILITY TRANSITION KIT
Name:	MITOCHONDRIAL PERMEABILITY TRANSITION:MitoPT™ JC-1 KIT
Format:	JC-1 Dye (Dual Green/Red Fluorescence)
Product Type:	Kits
Quantity:	400 TESTS

## **Product Details**

Applications	This product has been reported to work in the following applications. This information is derived from testing within our laboratories, peer-reviewed publications or personal communications from the originators. Please refer to references indicated for further information. For general protocol recommendations, please visit <u>www.bio-</u>					
	rad-antibodies.com/protocols.					
		Yes	No	Not Determined	Suggested Dilution	
	Flow Cytometry	•				
	Immunofluorescence	•				
	Where this product has not been tested for use in a particular technique this does not necessarily exclude its use in such procedures. Suggested working dilutions are given as a guide only. It is recommended that the user titrates the product for use in their own system using appropriate negative/positive controls.					
Product Information	The MitoPT JC-1 kit use between non-apoptotic a				-	
Test Principle	An early indication of apo the mitochondrial membro by a unique fluorescent of tetraethylbenzamidazolo JC-1 kit.	rane. Loss cationic dy	s of mitoc ye known	hondrial membrane po as JC-1 (5,5',6,6'-tetra	tential can be detected achloro-1,1',3,3'-	
	The MitoPT JC-1 reagent easily penetrates cells and enters the mitochondria. It aggregates in the mitochondria of non-apoptotic cells and fluoresces red, whilst in apoptotic cells it diffuses throughout the cell. Once dispersed, the reagent assumes a monomeric form and fluoresces green. This allows an easy distinction between non-apoptotic red fluorescent cells and apoptotic green fluorescent cells which can be read with a flow cytometer, fluorescence microscope or a fluorescence plate reader using black microtitre plates.					
Reagents In The Kit	MitoPT JC-1 Reagent, 4					

Two bottles 10x Assay Buffer, 125 mL

CCCP (50 mM in DMSO), 600 ul.

Instructions F

Storage	C s ir	Store the unopened kit and each unopened component at -20°C until the expiration date. Once opened, some components may be stored at 2-8°C until the expiration date. CCC should be stored frozen. Once reconstituted with DMSO, dilute and use MitoPT reagent immediately, or store at ≤-20°C for 12 months protected from light and thawed no more than twice.
Guarantee	G	Guaranteed until date of expiry. Please see product label.
